Tips on GPS usage:

1. Factors Affecting GPS Signals:
 - Other signal interference in the car.
 - Severe weather (rainstorm or snowstorm, etc).
 - In tunnels with weak signal or in remote mountainous areas.
2. GPS video must be installed with a dedicated player (GXPlayer) to view.
3. To view GPS videos in the mobile APP, you must first download these videos to local files.

V. Installation Guide

1. Turn off the car engine.
2. Insert the TF card into the card slot of the recorder.
Please use a high-speed TF card (Class10 or above) with a capacity of not less than 512MB, and the TF card supports a maximum of 256GB.
3. Fix the recorder on the original rearview mirror of the car.
4. Insert the car charger into the cigarette lighter of the car.
5. Connect the USB port of the recorder and the car charger with the charging extension cable.

Note: The charging extension cable can be laid along the edge of the windshield of the car when wiring.

6. Install the rear camera at the back of the vehicle, pay attention to the direction when installing. The wiring can be laid along the roof of the vehicle.

After the installation is completed, connect the rear plug to the rear camera port of the recorder.

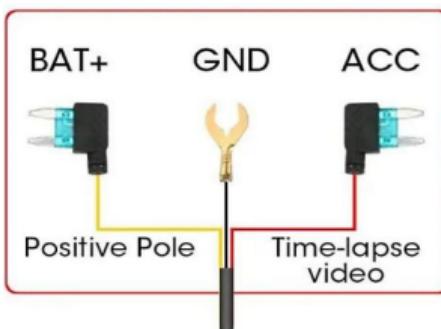

7. Adjust the position of the lens to ensure that the lens is level with the ground.

8. Start the engine and check whether the machine has been installed correctly.

[Note] When the machine is installed correctly, the system working indicator light is lit; the machine starts to enter the recording state, the video indicator light flashes. Please pay attention to check whether the screen on the display is normal, if the display screen is inverted image, please contact us in time.

9. If the kit you ordered includes our original Hardwire Kits, in the state of parking monitoring, it can realize the time-lapse video function, record one frame per second, which can greatly save the memory capacity.

As Shown:

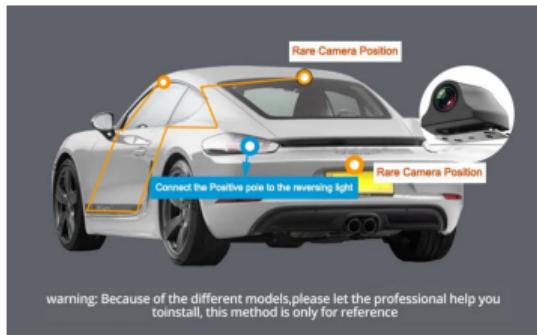

**Input: 12/30V
Output: 5V/2.5A**

Installation Schematic:

Easy to Install

Install within 15 minutes.

Warning:
In strict accordance with the instructions to install, prevent the recorder burn, recommended professional master installatic

Common Trouble

Fault	Cause	Solution
The machine cannot be turned on	Check if the power cable of USB port is loose	Re-insert or replace
Video is not clear	Whether the lens is dusty or dirty / whether the car glass is dusty or dirty	Clean it with a dust free cloth
Recorded video exposure	Check that the camera angle is toward the sky	Re-adjust camera angle
No video recording	Check T-card insertion/ damage	Re-insert or replace
Cannot loop video recording	Check if the video file is locked	Format memory card/ restore factory settings

Warning:

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help

RF Exposure Statement

To maintain compliance with FCC's RF Exposure guidelines, this equipment should be installed and operated with minimum distance of 20cm the radiator your body. This device and its antenna(s) must not be co-located or operation in conjunction with any other antenna or transmitter.
