

Wireless lapel microphone

User Manual

ID Diagram

How to use

Step1: Plug microphone receiver into the phone. After the plug-in, the receiver's indicator flashes red light.

Note for some type-c charged android phones

1. Some Android phone/pad can't connect to the wireless microphone directly to use, if the receiver doesn't connect to the microphone, (the receiver's indicator doesn't flash red light after plug in), Please search "OTG" in the phone/pad settings page and turn on.
2. Some Android phone/pad can't use their own cameras, (the microphone doesn't pick up your voice after connecting), please download "Open Camera" app to get the camera to recognize external mics(in the setting of the Open Camera).

Step 2: Press the Turn on/Off/Pause button of the microphone. The indicator of microphone turns green.

Note: if it is the first time you use the microphone, it will search the receiver first for pairing. During searching, the indicator of the microphone turns between red and green. After successfully connected, the indicator turns green.

Now the microphone is ready to work.

Noise Reduction

The microphone is power on into the Noise Reduction Mode.

The indicator of microphone keeps green light.

Paused (Mute)

Note, to stop microphone from working, you can double press the Turn on/Off/Pause button. The indicator of microphone turns red.

Double press Turn on/Off/Pause button again, the microphone will back to work.

Charging your phone while recording through receiver (Receiver need not to be charged)

When your phone is low battery, you can charge it through the type-c /lightning port of the receiver.

For phones with type-c port, charge it with the type-c cable. For phones with lightning port, charge it with the lightning cable.

Note, some models may not have this function. The actual product shall govern.

When the microphone is low battery, the indicator of the microphone flashes red light. Charge the microphone with the type-c cable.

Note: the type-c cable is only used to charge the microphone.

About UI

Microphone Transmitter

Function	How to use	Light
Power on	Press button  for 3 seconds	Red and green light flashing
Power off	Press button  for 3 seconds	Light off

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

.....

- The device contains licence-exempt transmitter(s)/receiver(s) that comply with Innovation, Science and Economic Development Canada's licence-exempt RSS(s). Operation is subject to the following two conditions:

- (1) This device may not cause interference.
- (2) This device must accept any interference, including interference that may cause undesired operation of the device.
- L'émetteur/récepteur exempt de licence contenu dans le présent appareil est conforme aux CNR d'Innovation, Sciences et Développement économique Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes :
- 1. L'appareil ne doit pas produire de brouillage;
- 2. L'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.
