Attention: Application Examiner

To whom it may concern

Kubota Tractor Corporation (KTC), grantee code: 2BOIZ, FRN: 0036846095 requests a Class II Permissive Change (C2PC) for the purpose of installation into the WorkSmart Autosteer ECU KAE104.

The WorkSmart Autosteer ECU KAE104, is a simple, low-cost, auto-steering product for agricultural applications. With Bluetooth and WiFi connectivity to the WorkSmart Autosteer App, it uses your own mobile device for a familiar user experience. It is compatible with the WorkSmart Autosteer Mechanical Drive Unit, KAMC06, and ISOBUS Steer Ready vehicles.

I confirm that there is no change in the design, circuitry, or construction, and the original test results continue to be representative of and applicable to the equipment.

Not used or supported are the 5725 MHz – 5850 MHz bands and there are two (2) internal regulated power supplies for the module which is consistent with modular integration instructions.

If you have any questions or comments, please do not hesitate to contact me.

Sincerely,

A handwritten signature in black ink, appearing to read "Mike Wittel", with a long horizontal flourish extending to the right.

Mike Wittel
