## Things to Try

**1. Two-phase Alarm**  
When the alarm sounds, any touch button functions as a Snooze button. You can hold any button to stop the alarm.

**2. Customize 2 Sound Buttons**  
Tap 'Edit' on the 'My Sounds' page, select a sound to replace, choose your preferred sound from the Library to add, and save – your device will sync automatically.

**3. Customize a Routine**  
Create your routine by modifying defaults or customizing with library sounds. Once set up, tap routine button  to start your routine – No Phone Required.

**4. Adjust Clock Brightness**  
The icon lights up during snooze.

**5. Bluetooth Speaker Mode**  
Press the mode switch button on the bottom of the device. Wait for the 'Bluetooth Speaker Mode' voice prompt. Check your phone's Bluetooth settings and connect to 'Luna Pro Speaker'.

**6. Adjust the Voice Prompt Volume**  
After pairing, tap the settings icon  on the 'My Plan' page → 'Prompt Tone Volume' and adjust the slider.

**NOTE:**

- The wake-up volume gradually increases to over 30 seconds, gently easing you into wakefulness.
- You can set the wake-up alarm to 10, 15, 20 minutes before the get-up alarm.
- By default, each snooze lasts 9 minutes and can repeat up to 3 times. Both settings are adjustable in the app.
- If a left touch, the alarm will automatically turn off after 1 hour.

## FCC Warning:

This device complies with part 15 of the FCC Rules. Operations are subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide protection against harmful interference in a residential installation. This equipment generates, uses and stores radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

**CC Radiation Exposure Statement:**  
This equipment complies with FCC radiation exposure limits set for an uncontrolled environment.
