

Smart Micro Display User Manual

V1.0.1

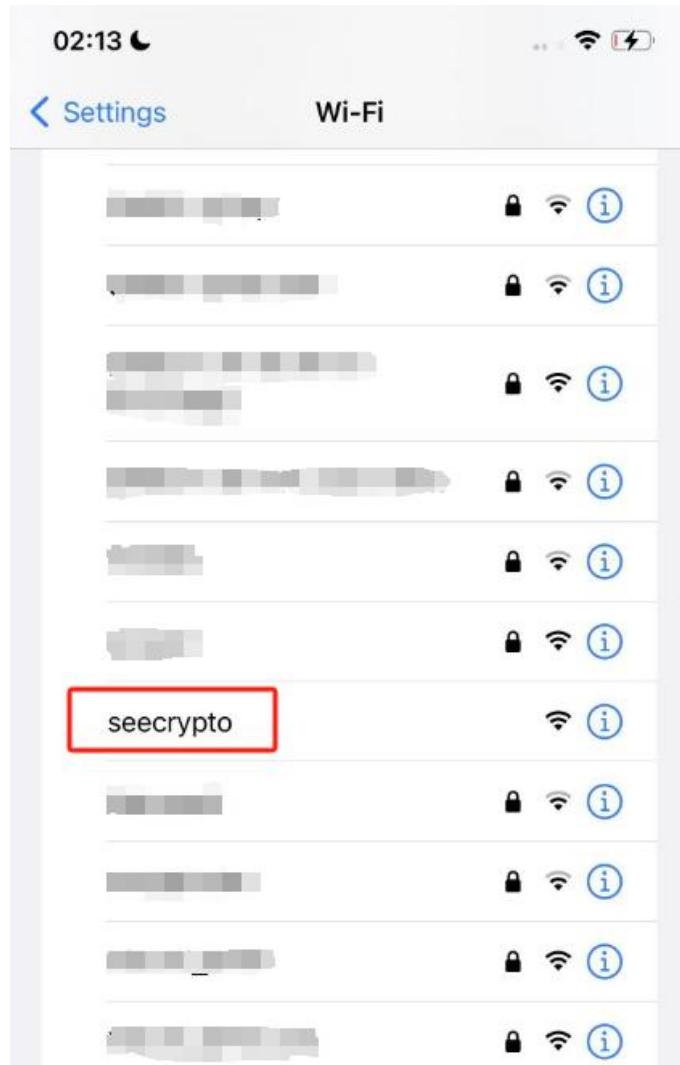

Support@SeeCrypto.net

Step1.

Connect the data cable, turn on the tracker.

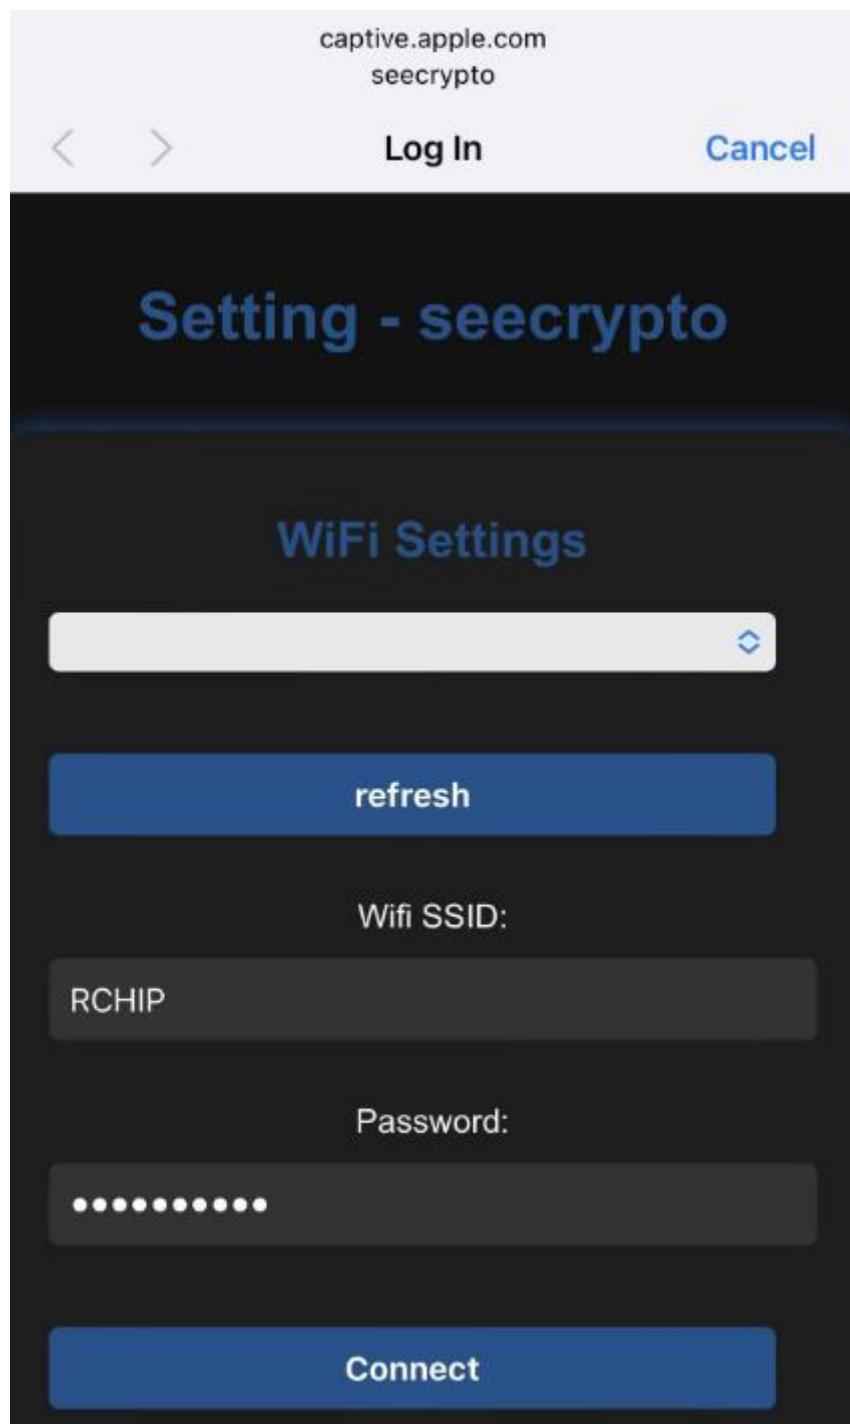

Turn on your phone -> Setting -> Wi-Fi.

Connect to this: **SeeCrypto**.

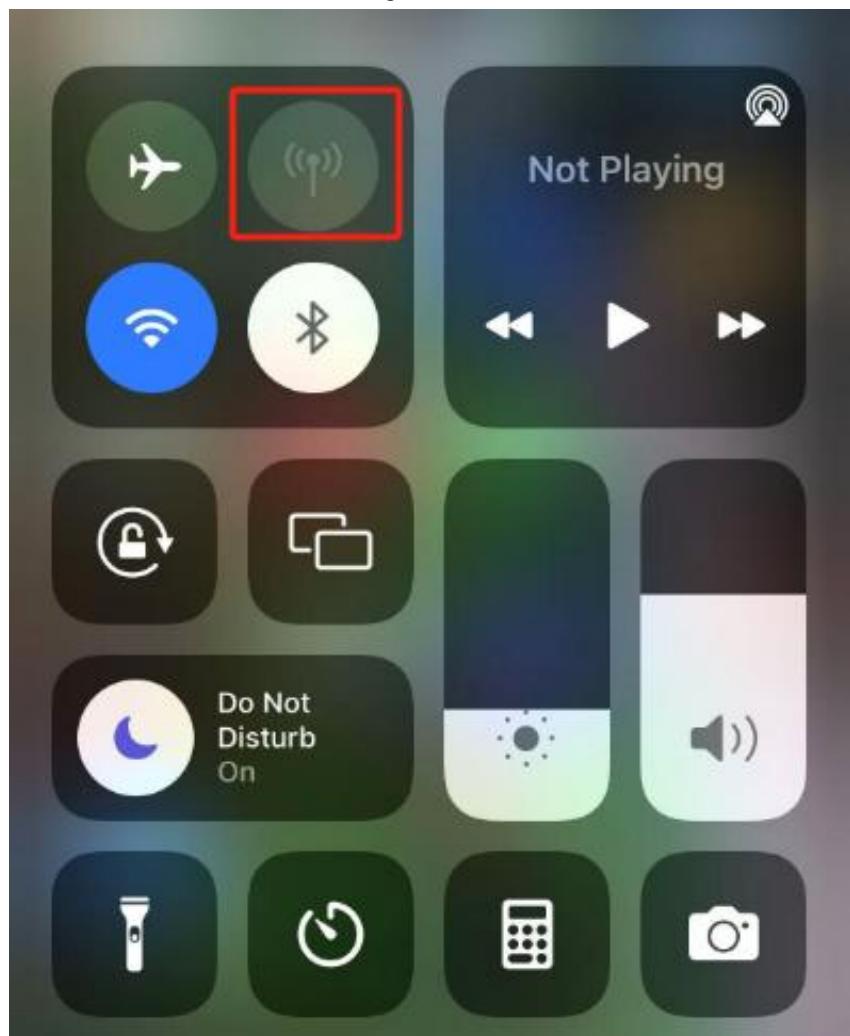

Tips: If the phone hint that this network has no Internet, it may not be safe. Please trust this network and keep linking.

The setting page will pop up automatically.

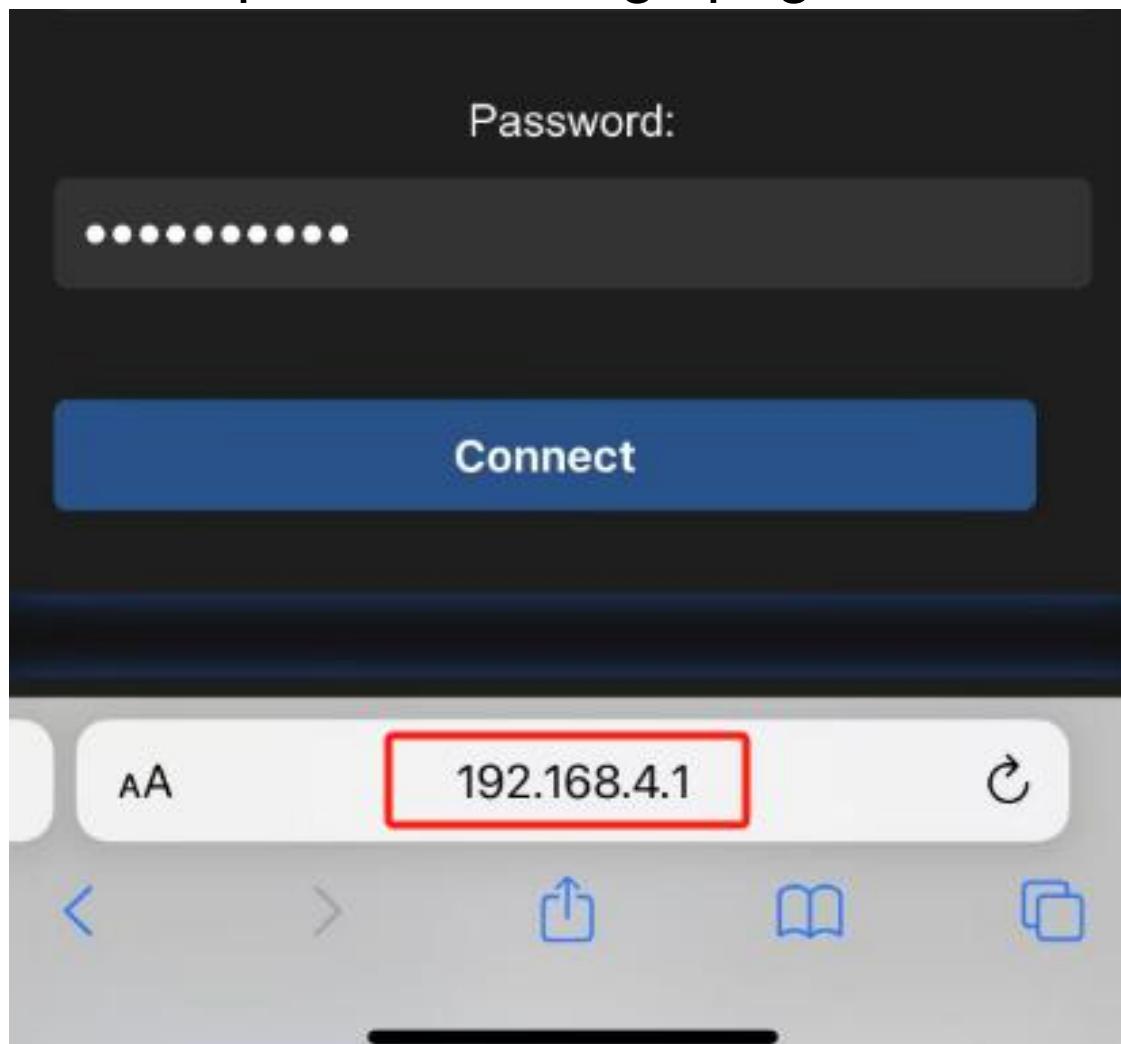

Tips: If the setup page pops up automatically, skip the next two pages and go directly to step 2.

If the settings page does not pop up,
keep your phone connected to the
"SeeCrypto" WiFi and **turn off mobile cellular**
data for your phone.

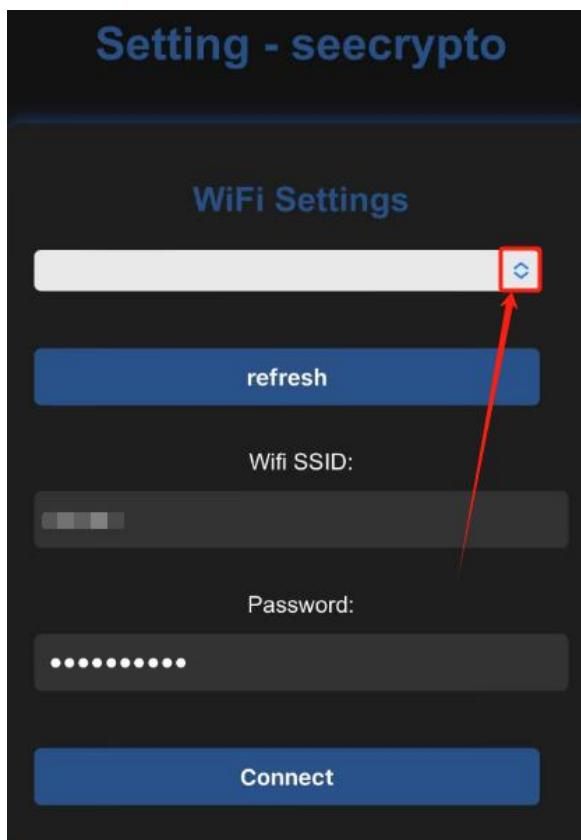

Then enter **192.168.4.1** in your mobile browser to open the settings page.)

Step2.

After the page opens, click the drop-down list under **WiFi Settings**, select your WiFi name, and enter the password, and click Connect. Then the tracker will automatically restart.

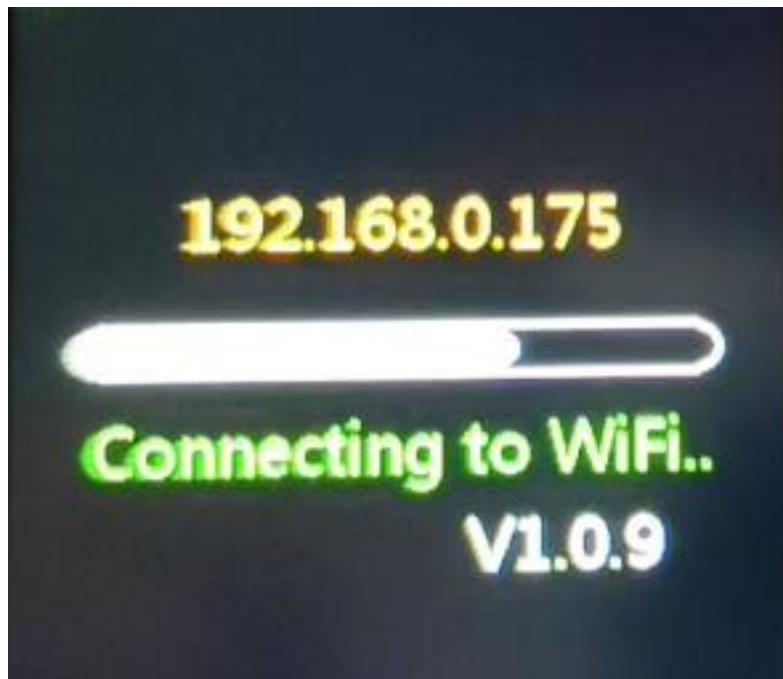

Tips: If the drop-down list does not have the name of your home Wi-Fi network, go back and click the **refresh** button, then click the drop-down list again. (Only supports 2.4G WIFI, 5G cannot be recognized.)

Enter the password, and click Connect. Then the tracker will automatically restart.

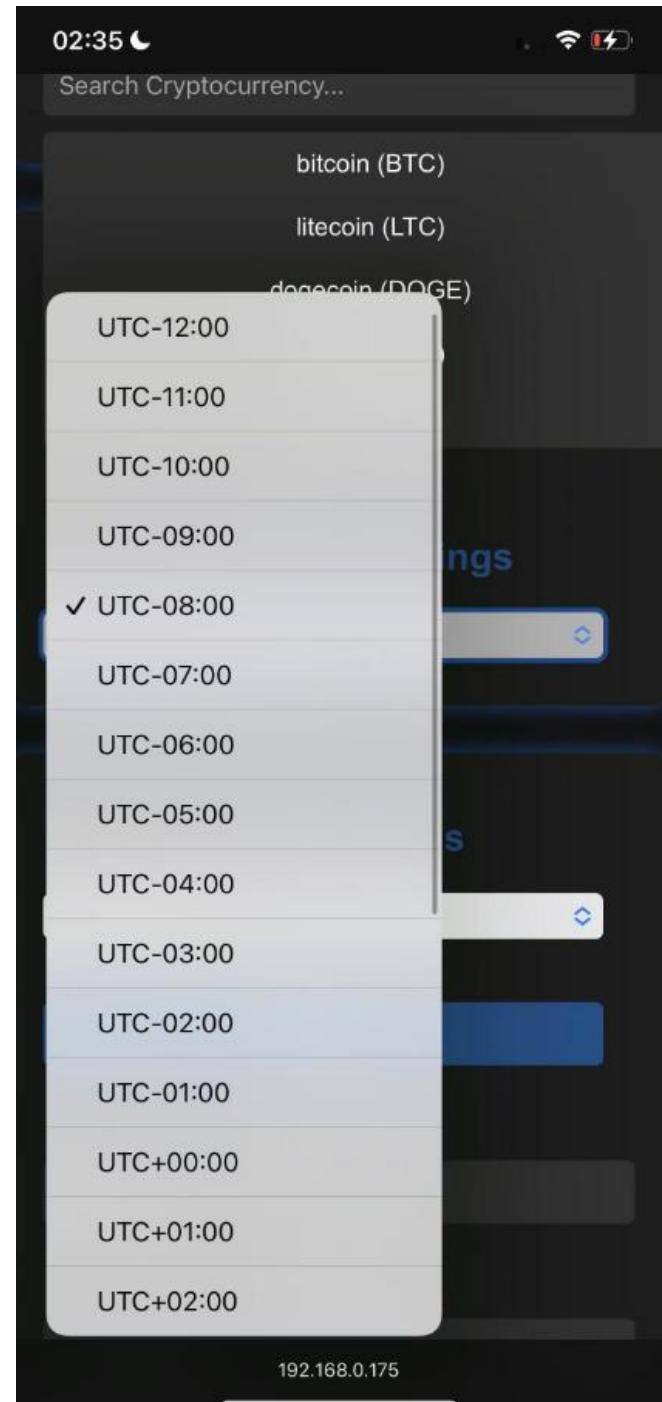

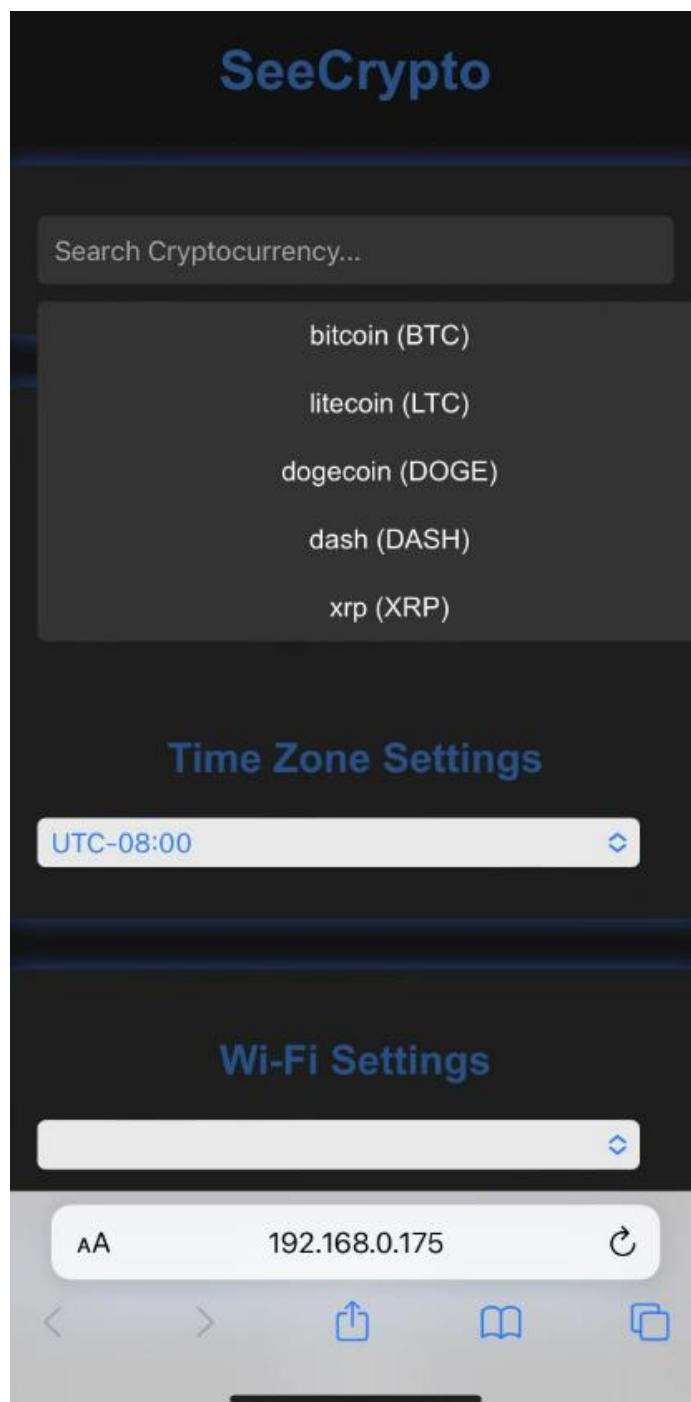

Step3.

After the tracker is restarted, a yellow IP address will be displayed, remember it.

Turn on your mobile browser and enter this IP address, which will open a more comprehensive settings page.

There are 300 crypto coins to choose from and you can also set your time zone.

Q&A

Q1:

I have entered the WIFI password, but after restarting the screen still shows that WIFI connect failed.

A1:

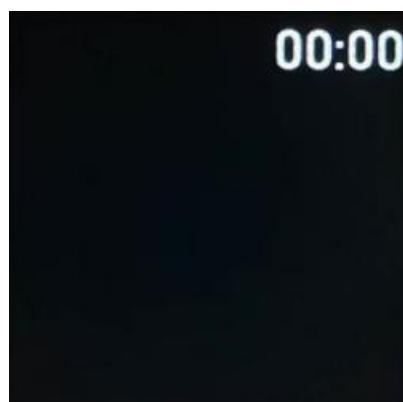

Move the tracker closer to the router and try connecting again.

If it still doesn't work. Turn off the router's firewall and adjust the encryption method of 2.4G WiFi.

Or you can use a mobile phone to open a hotspot, let the tracker connect to the hotspot, and see if it can be accessed.

Q2:

I'm connected to WiFi, but after rebooting the screen is black with 00:00 in the upper right corner.

A2:

This is because the router is not connected to the Internet.

Some campus networks, shopping malls, supermarkets, hotels, KFC, McDonald's and other public places' networks (which require secondary verification) cannot distribute Internet to tracker.

FCC WARNING

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception,

which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

To maintain compliance with FCC's RF Exposure guidelines, This equipment should be installed and operated with minimum 20cm distance between the radiator and your body: Use only the supplied antenna.
