4. Technical Parameters

Tuner Part:

FM Frequency Range	87.5MHz-108MHz
FM noise-limited sensitivity	FM $\leq 26\text{dB}$
FM signal to noise ratio (S/N)	$\geq 45\text{dB}$

USB/MMC/SD Part:

Frequency Response	100Hz- 10kHz(+ 10dB)
MP3 bit rates	8-320kbps
Channel balance	$\leq 3\text{ dB}$
Channel Separation	$\leq 22\text{dB}$
MP3 Signal to noise ratio (S/N)	$\geq 55\text{dB}$
Working voltage	12V DC
Real power output	4*25W/14.4V
Speaker impedance	4 Ω -8 Ω
Size dimensi	180mm(W)x52mm(H) x151(L)

5. INSTALLATION/UNMOUNTING

Before installation check the power supply of the vehicle. the condition of the device and if all functions work properly on the device. Always use the supplied accessories for the mounting, using of different parts may result faulty operation. Make sure when you mount the device that it can not cause any injury in case of braking. Avoid the mounting on places where the device is exposed to direct heat, dust etc.

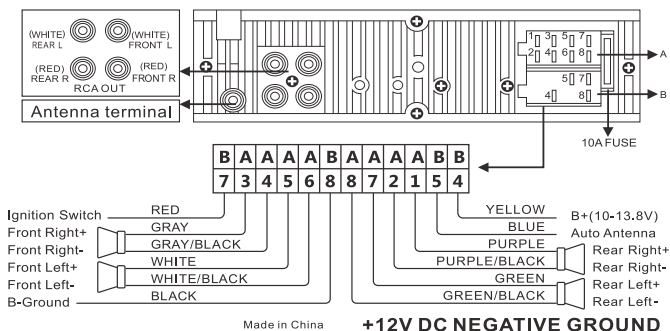

Installation of the device: Place the mounting face into the dashboard, push the dips of the frame then push the radio in until it stays secure and fastened.

Unmounting of the device: Place the enclosed 'keys' (as seen on the picture) into the holes on both sides of the device until you hear a click sound, then pull the device-while holding the 'keys'-from the dashboard.

6. Wiring Diagram

7. Trouble shooting

Fault	Reasons	Solutions
LCD doesn't display	1.Yellow wire is not connected with battery + 2.Fuse of red wire is open	Assure yellow wire is connected with battery +Replace fuse
No sound	1.No power supply 2. Speaker wire is open circuit 3.SD/MMC card, U disk don't have song with corresponding format. 4.SD/MMC card, U disk golden finger is dirt which causes bad contact.	Connect the power wire. Connect speaker wire. Check the contents of SD/MMC card, U disk. Clean with absolute alcohol.
LOW sound (not clear)	1.Power internal resistance is high. 2.Antenna is bad contact.	Replace the power supply Tighten the antenna plug.
Mono track	1.One channel of speaker wire is open circuit 2.Amplifier integrated circuit is damaged.	Connect speaker wire Replace the IC of amplifier

Note: Technical data is subject to change without prior notify.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction
