Wireless Microphone manual

Product Introduction

Thank you for choosing our products

This product is a smart wireless microphone that can provide professional recording output. Plug and play, no application required. Wide range of uses: can be used for online live broadcast, video log shooting, program production interviews, recording, video teaching and other occasions. The wireless microphone consists of three parts: microphone transmitter, receiver and charging compartment. (As shown below)

Product Image

- ① Microphone port
- ② Power button
- ③ Mode switch button
- ④ Clip
- ⑤ Microphone Type-C charging port
- ⑥ Power indicator
- ⑦ Connection display
- ⑧ Silent mode
- ⑨ Noise reduction mode
- ⑩ Receiver Type-C port
- ⑪ Receiver Type-C charging port
- ⑫ Receiver indicator light

How to use the receiving end

Step 1: Plug the receiver into the port of the mobile phone, and the blue light of the receiver flashes quickly.

Step 2: Press and hold the microphone's power button. When the green light comes on, it means it is turned on successfully.

Step 3: The indicator light of the receiver and microphone connection is always on, which means the connection is successful. Open the live video app on your phone and use the microphone to receive audio.

Special Notes:
If the phone battery is low during live broadcast, the external power supply can charge the phone directly through the receiver's charging port.

Instructions

Microphone TX

Function	Key Operation	LED Status
Power on	Take it out of the charging case	Lights on
Shutdown	Put it in the charging compartment	
Noise Reduction	Automatically turn on when powered on	Noise reduction light is always on
Mute	Double-click the mode key	Mute light is always on
reverberation	Triple-click the mode key	On: The connection indicator blue light flashes. Off: The current light is restored.
Charge	Type-C port charging	The red light is on and turns off when fully charged
Search for matches		Blue light flashes slowly
Pairing successful		Blue light is always on

Receiver RX

Function	LED Status
Power on/off	Blue light flashing/blue light off
Search for matches	When not connected, two blue lights flash slowly at the same time. When connected to 1 TX: one blue light is always on, and the other light flashes for 15 seconds and then goes out. When connected to 2 TX: both lights are always on.

- (1) Microphone transmitter (TX)
- (2) Receiver (RX)
- (3) Charging case
- (4) Type-C charging cable
- (5) User manual

Thanks for using

FCC WARNING

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Note: The Grantee is not responsible for any changes or modifications not expressly approved by the party responsible for compliance. Such modifications could void the user's authority to operate the equipment.

The device has been evaluated to meet general RF exposure requirement. This equipment complies with FCC's RF radiation exposure limits set forth for an uncontrolled environment. This device and its antenna(s) must not be co-located or conjunction with any other antenna or transmitter.
