please scan the QR code on the right.

01 Install Frame

Fix the printer base housing and frame from the bottom with NO.1 bag screws.

01 Install Frame

Insert the Z-axis motor wire into the hole from the back of the printer and secure it.

02 Connect Printhead Cable

1. Press the printhead cable (Orange Type-C long cable) down and insert it into the slot above the printhead.
2. Secure the cable with the screws from bag No. 2.

03 Install Printhead

Install the printhead from the back of the printer. Use the No. 3 bag screws to secure the printhead by turning it clockwise in the position shown in the figure.

It is recommended to first tighten the two screws at the top and then the screws at the bottom.

Note: Please install screws in the holes highlighted in white.

04 Install Screen

1. Use No. 4 bag screws to install the screen .
2. Plug the FPC cable into the port behind the screen by pressing the terminal.

Note: When installing the FPC cable, please make sure this side is facing up.

05 Connect the X-axis Motor Cable

Insert the motor cable (Orange 6 Pin short cable) upward into the bottom groove on the left side of the X-axis to tighten it. Note that the cable buckle faces forward.

06 Install Cable Holder

1. Press down the cable holder to secure it to the groove on the left side of the X-axis.
2. Insert the printhead cable into the cable holder.

07 Install Purge Wiper

1. Slide the purge wiper from the back to the front into the groove on the rear side of the X-axis.
2. Use the No. 5 bag screw to secure the purge wiper from the back and bottom of the X-axis.

08 Install Filament Tube

1. Insert one end of the filament tube into the hub above the printhead and the other end into the cable holder.
2. Snap the filament tube and printhead cable into the cable organizer.

Note:
If the filament tube cannot be inserted into the cable holder successfully, you can first remove the blue retainers on the cable holder, insert the filament tube, and then put the blue retainers back to its original position.
