

TEST REPORT

Report Reference No...... : **MTEB25040088-H**

FCC ID..... : **2BORV-WJ014**

Compiled by

(position+printed name+signature)..: File administrators Alisa Luo

Supervised by

(position+printed name+signature)..: Test Engineer Sunny Deng

Approved by

(position+printed name+signature)..: Manager Yvette Zhou

Date of issue..... : **Apr.09,2024**

Representative Laboratory Name. : **Shenzhen Most Technology Service Co., Ltd.**

Address..... : East A, 1 Floor of New Aolin Factory Building, Langshan Erlu North
District, Hi-Tech Industry Park, Nanshan, Shenzhen, Guangdong,
People's Republic of China

Applicant's name..... : **Shenzhen Grey Whale Cloud Supply Chain Co. , Ltd**

Address..... : 27B, 27/F, Tower 12, Music Center, Longgang District, Shenzhen

Test specification/ Standard..... : **47 CFR Part 1.1307**

47 CFR Part 2.1093

TRF Originator..... : Shenzhen Most Technology Service Co., Ltd.

Test item description..... : Remote Control Car

Trade Mark..... : gerlen

Model/Type reference..... : wj014

Listed Models : wj014A,wj014B,wj014C,wj014D,wj014E,wj014F

Modulation Type..... : GFSK

Operation Frequency..... : From 2405-2475MHz

Hardware Version..... : V 1.0

Software Version..... : V 1.0

Rating..... : DC 3V by Batteries

Result..... : **PASS**

TEST REPORT

Equipment under Test : Remote control

Model /Type : wj014

Listed Models : wj014A,wj014B,wj014C,wj014D,wj014E,wj014F

Remark : Only the appearance color and model name are different.

Applicant : Shenzhen Grey Whale Cloud Supply Chain Co. , Ltd

Address : 27B, 27/F, Tower 12, Music Center, Longgang District, Shenzhen

Manufacturer : Shenzhen Grey Whale Cloud Supply Chain Co. , Ltd

Address : 27B, 27/F, Tower 12, Music Center, Longgang District, Shenzhen

Test Result:	PASS
---------------------	-------------

The test report merely corresponds to the test sample.

It is not permitted to copy extracts of these test result without the written permission of the test laboratory.

Contents

1. Revision History

Revision	Issue Date	Revisions	Revised By
00	2025.04.09	Initial Issue	Alisa Luo

2.1 RF Exposure Compliance Requirement

2.1.1 Standard Requirement

According to KDB447498D01 General RF Exposure Guidance v06

4.3.1. Standalone SAR test exclusion considerations

Unless specifically required by the published RF exposure KDB procedures, standalone 1-g head or body and 10-g extremity SAR evaluation for general population exposure conditions, by measurement or numerical simulation, is not required when the corresponding SAR Exclusion Threshold condition, listed below, is satisfied.

2.1.2 Limits

The 1-g and 10-g SAR test exclusion thresholds for 100 MHz to 6 GHz at test separation distances ≤ 50 mm are determined by:

$$\left[\frac{(\text{max. power of channel, including tune-up tolerance, mW})}{(\text{min. test separation distance, mm})} \right] \cdot$$

$$[\sqrt{f(\text{GHz})}] \leq 3.0 \text{ for 1-g SAR and } \leq 7.5 \text{ for 10-g extremity SAR, where}$$

$f(\text{GHz})$ is the RF channel transmit frequency in GHz

Power and distance are rounded to the nearest mW and mm before calculation¹⁷

The result is rounded to one decimal place for comparison

The test exclusions are applicable only when the minimum test separation distance is ≤ 50 mm and for transmission frequencies between 100 MHz and 6 GHz. When the minimum test separation distance is < 5 mm, a distance of 5 mm is applied to determine SAR test exclusion

2.1.3 EUT RF Exposure

$$\text{EIRP} = \text{PT} * \text{GT} = (\text{E} \times \text{D})^2 / 30$$

where:

PT = transmitter output power in watts,

GT = numeric gain of the transmitting antenna (unitless),

E = electric field strength in V/m, $10^{(\text{dB}\mu\text{V}/\text{m})/20} / 10^6$,

D = measurement distance in meters (m)---3m,

So $\text{PT} = (\text{E} \times \text{D})^2 / 30 / \text{GT}$

The worst case (refer to report MTEB25040088-R) is below:

Antenna polarization: Horizontal		
Frequency (MHz)	Level (dBuV/m)	Polarization
2405	76.95	Peak
2405	59.60	Average

Antenna polarization: Vertical		
Frequency (MHz)	Level (dBuV/m)	Polarization
2405	79.70	Peak
2405	54.95	Average

For 2405MHz wireless:

Field strength=79.70dBuV/m

Ant gain:0dBi;so Ant numeric gain=1

$$\text{EIRP} = \text{PT} * \text{GT} = (\text{E} \times \text{D})^2 / 30 = (10^{(\text{dB}\mu\text{V}/\text{m})/20} / 10^6 * 3)^2 / 30 = 0.000028\text{W}$$

$$\text{So PT} = \text{EIRP} / \text{GT} = 0.000028\text{W} / 1 * 1000 = 0.028\text{mW}$$

$$\text{So } (0.028\text{mW} / 5\text{mm}) * \sqrt{2.405\text{GHz}} = 0.00868$$

exclusion=0.00868<3.0 for 1-g SAR

So the SAR report is not required.
