

**Safety Instructions**

1. Heed all safety warnings and follow all instructions.
2. Only use a dry cloth to clean this product.
3. Do not block any interface of the product. Please use the product according to the instructions provided by the manufacturer.
4. Do not place this product near any heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.
5. Protect the power cord to prevent it from being walked on or pinched, particularly at the plug, receptacle, and other points where it exits the product.
6. Please use attachments/accessories specified by the manufacturer.
7. In case of thunderstorm or if the product is not to be used for a long time, please unplug it.
8. All repairs should be performed by professional repair personnel designated by the manufacturer (or authorized dealer). Repairs are required if the product is damaged, such as liquid splashing or debris entering the product, or the product is exposed to rain or moisture, resulting in malfunction, or the product falls and is damaged.
9. There is a danger of explosion if the battery is incorrectly replaced. Replace only with the same or equivalent type. The battery must not be exposed to excessive heat such as sunlight, fire or similar environments.
14. The product is not equipped with a power adapter when it is shipped. When using it, please choose a power adapter that has passed national certification. The output voltage of the adapter is 5V DC and the output current is not less than 1A.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

**NOTE:** This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

-- Increase the separation between the equipment and receiver.

-- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

-- Consult the dealer or an experienced radio/TV technician for help.

**Warning:** changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

The device has been evaluated to meet general RF exposure requirement, the device can be used in portable exposure condition without restriction.

**Specifications**

BT version	V5.4
BT distance	10M
Signal-to-Noise Ratio	≥70dB
Frequency Response	80Hz~20KHz
Speaker impedance	4Ω
Internal battery	Lithium battery 3.7V
Charging voltage	DC 5V
Charging time	About 3hrs
Product size	76*76*118mm

**Precautions for use**

- When the speaker is in low power or not in use for a long time, the battery should be fully charged and then turned off for storage to extend and protect the battery life.
- The red indicator light is always on when charging, and goes out when fully charged.
- It is recommended that you avoid using the speaker while charging. Using the speaker while charging can easily cause overheating, and long-term discharge at high temperatures can increase battery loss.
