

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation of the device. This equipment has been tested and found to comply with the requirements. However, you are encouraged to use good shielding practices when using the equipment.

NOTES: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment has been tested and found to comply with the limits using standard test methods. Your use of the equipment may cause interference to radio communications, television reception, or other electronic equipment. If you experience such interference, you are encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

If these measures do not solve the problem, you are encouraged to report the problem to the dealer. The dealer should be contacted within 90 days of the date the equipment should have been installed and operated for minimum 20 hours between the radiator and your body.
