【Tips and Warnings】

In order to emphasize the important information of the user manual, special attention should be paid when seeing the label ⚠,which indicates some important warnings and reminders.

【Important Tips】

Please read all instructions before installation, it is recommended that the machine be installed by a car audio professional.

⚠This machine is suitable for vehicle 12V power supply system (grounding wire is required), please do not install this machine in 24V vehicle, otherwise it will damage the machine.

🚫Do not repair the power fuse without professional guidance. Improper use of the fuse can cause damage to the machine or cause a fire.

🚫To avoid violating traffic rules, drivers cannot watch videos while driving and operating machines to avoid unnecessary accidents.

🚫For the sake of safety and to ensure the normal use of the product, please invite professionals to install, disassemble or repair the machine to avoid machine damage and accidents.

🚫Please avoid placing this product in a humid environment and water to avoid fire due to electric shock or other unnecessary damage.

Note: To prevent burning out the machine, please do not energize until you have connected the power cord correctly！

【Test】

A quick simple test before the installation is to confirm that the device is working normally and as expected. In case there is a wrong step in the subsequent installation, which causes it to fail to work. If you perform a successful test but the unit did not work after installing it please recheck the installation steps.

Test car stereo: ①The red and yellow wires of the car stereo combine together firstly and then connected to the positive pole of the 12V battery, ② The black wire is connected to the negative pole of the battery. ③ 2 seconds later, check the car stereo, if the screen is lighting up, it means

the car stereo is proper functioning.

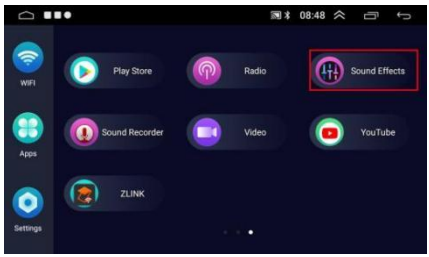
	Maps	Touch to enter google map online
	ZLINK	Touch to enter ZLINK, can connect wired & wireless Carplay/Android Auto
	Sound Effects	Touch Adjustable Settings Sound Effects

【Main functions and usage】

1. Hi-Fi function



Hi-Fi function, high-fidelity sound quality, perfect playback of the original sound field, can perfectly reproduce the sound of music or video, without distortion, bringing you the most authentic sound. Hi-Fi function brings you an immersive experience.

Click to enter Sound Effects, you can adjust and set the sound effects, click HiFi, the font turns red, indicating that the HiFi function is being used; click HiFi again, the font turns gray, indicating that the HiFi function is turned off

2. Wireless & Wired Carplay/Android Auto—Zlink

Carplay Connection Considerations

1.Carplay function only supports Apple mobile phone connection

2.The data cable used for Carplay connection must be the original iPhone data cable

Android Auto Connection Considerations

1.The Android Auto function can only support the connection of Android phones, and the Huawei version of the phone does not support the connection

2.Your Android phone needs to support Google services and install Andriod Auto software

3. Supported Additional Devices

(Note: Additional devices are not included in the product and accessories, you need to purchase additionally！)

Icon	Name	Connection Way
	External Microphone	RCA MIC Interface
	DAB+	USB
	DVR	USB
	OBD	Bluetooth

Thank you again for using our product. If you have further questions, please contact our customer service staff. Product UI interface or functions may be modified and upgraded from time to time without notice. It is normal if the manual has some discrepancies !

FCC statement

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and

(2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

-Reorient or relocate the receiving antenna.

-Increase the separation between the equipment and receiver.

-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

-Consult the dealer or an experienced radio/TV technician for help.

FCC Radiation Exposure Statement

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment.

This equipment should be installed and operated with minimum distance 20cm between the radiator &you body.
