

F1 FORMULA REMOTE CONTROL RACING MANUAL

Thank you for using our toy products. In order to make you have a better understanding of this product, please read the following instructions before use, which will bring you a different sense of operating experience.

Note

- Electronic control products
- This product is suitable for children 14 years old and above. After being assembled and charged by adults, the children can play.
- Please use this product under the supervision of an adult.
- Please do not disassemble or modify this product without authorization. Any modification may cause the product to fail to operate normally.

Precautions for use

- The toy car uses 1 piece of 3.7V rechargeable lithium battery; the remote control uses 2 sections of 1.5V "AA" non-rechargeable batteries;
- Take out and install the battery according to the polarity and voltage in the toy battery room;
- 2 sections of 1.5V are non-rechargeable batteries, please don't charge them;
- The rechargeable battery must be charged under the supervision of adults;
- Different types of batteries or old and new batteries should not be mixed;
- The battery of the car body must use the configuration of original factory, and use the USB provided by the original factory to charge the body battery;
- If you stop to play, take out the batteries from the car;
- The power terminal must not be short circuited;
- Use a screwdriver to open the screws on the battery compartment cover of the remote control, and install the battery according to the correct positive and negative polarity; Connect the power plug line with the body power line according to the correct polarity. Then close the battery cover and tighten the screws;
- Repair and maintenance: This product is composed of plastic, hardware and electronic components. Avoid water ingress, don't place or use in a humid environment for a long time. Regularly check whether the wires, plugs, housings and other parts are defective, if found, stop using them and wait until they are repaired before using them.

2.4G automatic code instructions

- When the battery is installed on the remote control, the indicator light of the remote control starts to flash, and the remote control car turns on the switch and starts to enter the connection state. When the connection is successful, the remote control indicator light goes out. Note: If the connection is not successful, please repeat the above operation.
- Each remote controller can only be connected with one remote control vehicle. When the connection is successful, each vehicle will not interfere with each other. Note: multiple vehicles cannot be connected at the same time.
- If the remote controller does not find the 2.4G signal from the remote control car one minute, it will automatically enter the sleep mode (the indicator light is off), you can press any key to exit the sleep mode.
- When it is necessary to pair other remote controllers or remote control vehicles of the same model, take out the battery of the remote controller and turn off the power supply of the remote control car. It can only be paired again after switching.

Operation tips

- Please make sure that the power switch is in the "ON" position, when you are operating, such as the power switch is in the "OFF" position, the remote control car is turn off.
- When the battery power is consumed, the left and right steering becomes insensitive, and the forward and backward will also slow down. At this time, the battery needs to be removed and charged.
- The effectively controls distance of this remote control car is about 40 meters. When the distance is exceeded, the remote control car may stop or imagine uncontrolled.

FCC Statement

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

RF Exposure Information

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
