

Operation Instructions

This Smart Driver allows you to control your room's lighting via the Tuya app on your smartphone. It connects to the app via Bluetooth without the need for WiFi, making operation more convenient. It can be combined with different light sources to form lights for use.

Warnings

- This light connects to devices via Bluetooth and does not rely on a WiFi network. However, ensure that the Bluetooth function on your smartphone is enabled.
- Do not connect the product to a power source while it is still in the packaging.
- The light is replaceable.

Important Information

Before installing or replacing the light, please read this manual in full and observe the following precautions:

- Do not install this product with wet hands or in a humid environment.
- Do not use a dimmer switch. Adjust brightness only through the dedicated app.
- Suitable for use within a temperature range of -20°C to 40°C.
- Do not open or disassemble this product. The light has a high level of integration, and unauthorized disassembly may cause damage.
- Do not use the product if it malfunctions, is damaged, or emits abnormal noises.
- Thoroughly clean the surface where the COB light source will be attached to ensure secure installation and good heat dissipation (COB light sources emit concentrated light, so the installation surface must be flat and unobstructed to avoid affecting heat dissipation).

4-Step Installation Method

1. Light Installation: Install the light in a suitable location, connect it to the dedicated adapter, and then plug the entire unit into a power outlet.
2. Installing the mobile app and creating an account: After installing the light, proceed with pairing. If you do not have the Tuya app, download it from the Android App Store or Apple Store. Open the app, and new users should follow the on-screen instructions to create an account.
3. Light Pairing: To register the new light, first ensure that the Bluetooth on your

smartphone is enabled. Then, tap the (+) "Add Device" button in the upper right corner of the app, select the "Bluetooth Devices" category. The app will automatically search for nearby light devices. Once the corresponding device is found, tap to connect and follow the on-screen instructions to complete pairing.

To reset to factory settings, press and hold the light's control button for 3-5 seconds. The light will flash at 50% brightness; release the button after 3 flashes. The device will then be restored to factory settings and can be re-paired. After successful pairing, the light will remain on at 100% brightness, and you can control the product via the Tuya app or by short-pressing the main button.

4. Completing Setup: After successful pairing, follow the prompts in the app to complete personalized settings such as device naming and grouping. No location authorization is required for use, making operation more straightforward.

FCC Caution

- This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
- Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
- Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy. If not installed and used in accordance with the instructions, it may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
 - Reorient or relocate the receiving antenna.
 - Increase the separation between the equipment and receiver.
 - Connect the equipment to an outlet on a circuit different from that to which the receiver is connected.
 - Consult the dealer or an experienced radio/TV technician for help.
- This device has been evaluated to meet general RF exposure requirements. The device can be used in the exposure condition without restriction.
- This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
