

User's Manual

MODEL:MXS-008

Attention

- ◆ The light source of stars and nebulae is strong, so eyes should not look directly at the light source.
- ◆ The brightness of the stars (ie laser brightness) is affected by the ambient temperature and time of use. When the ambient temperature is hot or the power-on time is longer, the brightness of the laser will decrease due to the heat of the light source. At this time, just turn off the power and let the laser emit The heat dissipation of the device (heat dissipation time usually takes more than 15 minutes) and then turn it on to restore the brightness.

Host Key Operation Instructions

- ① Long press to switch the machine on/off, Short press to switch between white noise mode, recording mode, and Bluetooth mode.
- ② Short press to play the previous song, Long press to increase volume .
- ③ Short press to play the next song, Long press to decrease volume .

Remote Control Instructions

Laser wavelength: 532nm
Nebula color: Colorful(controllable monochrome)
Shell material: ABS/ENAMEL
energy consumption: <5W
input power: 5V2A
Operating temperature: 10°C~60°C degrees Celsius
Single gross weight: 190g
Product Size: 95mm x 95mm x 195mm
USB length: 1.4m

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Radiation Exposure statement

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
