Questions

Q: How to reset your earbuds(These problem can be solved by this way: unstable Bluetooth connection , the sound is out of sync, and the device cannot be connected)

A: 1. Take out the earphones and quickly press the L/R earphones button eight times, and the earphones quickly flashes a white light three times (this means that your operation is successful).. Then put the earphones in the charging case.

2. Click the icon behind "TP01" in the bluetooth of your phone and select "Forget this device."

3. Finally take out the earphones and reconnect it to your device again.

Q: How does the headset connect to the device?

A: 1. Open the charging case cover and take out the earphones

2. Turn on your device's bluetooth and the bluetooth list shows "TP01"

3. Tap "TP01". The device displays a successful connection.

Q: What if my headphones can connect to my phone, but not to my computer?

A: Please turn off your phone's Bluetooth before connecting the headset to your computer.

(Because the earphone automatically connects to the last paired device, for this reason, you want the earphone to connect to the next device, please turn off the Bluetooth of the previous device)

10

Maintenance

After a period of use, the charging metal contacts of the earphones may be polluted by sweat and dirt, causing the earphones to fail to turn on or charge; and the protective grille of both earphones may accumulate earwax and dust, resulting in muffled volume.

If you experience issues with the earphones not charging, use a clean, soft cloth to gently wipe the charging metal contacts to remove sweat and dirt.

If you experience earphone sound muffled, not as loud as when you first started using it. Use a soft brush or cotton swab to gently remove earwax and dust from the grille. Avoid using sharp objects to avoid damage.

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

-- Reorient or relocate the receiving antenna. -- Increase the separation between the equipment and receiver.

-- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

-- Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this

12

device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

The device hasbeen evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
