Power Bank Instruction Manual

Overview

- ① Power button
- ② USB output
- ③ Type-C input\output
- ④ Power indicator
- ⑤ Magnetic wireless charging area
- ⑥ Holder

Specification

Capacity: 10000mAh
USB-C input: 5V/3A, 9V/2A, 12V/1.5A(18W)
USB-C output: 5V/3A, 9V/2.22A, 10V/2.25A(SCP),
12V/1.67A(max 22.5W)
USB-A output: 5V/3A, 9V/2A, 10V/2.25A, 12V/1.5A(max 22.5W)
Wireless output: 15W
Size: 97.3*67.6*18mm (with holder 19.5mm)

Charging the Power Bank

Use a separate USB to Type-C cable to charge this power bank.
The power indicators will flash while charging, and will be all lit
when it's fully charged.

Operation

Use any charging cable you have to connect the power bank to your device.

The speed of charging depends on the capacity of your device internal battery.

The power indicators will be lit when it's in use, and indicate how much power is left in the power bank.

(There are 5 lights. Four of them are power indicators, 1 light is about 25%. The last light is wireless charging indicator)

Product safety

·Read all instructions before using the power bank.

·After use, remove all cables to avoid consuming the capacity of this product.

·Keep the power bank away from water and do not use if contact is made.

·Keep the power bank away from heat sources.

(Exposure to high temperatures may result in explosion)

·Do not leave the power bank charging overnight or unattended.

·Do not store for long time without any charge.

·Do not drop/open/crush the power bank.

·Do not store the power bank in extremely high or low

temperatures. (Storage suggested temperature: -20 ~ +35 C)

·Do not use the power bank in excess of the output rating, overloading may result in fire or injury.

Dispose of rechargeable batteries carefully.
Do not mix battery types.

FCC Warning Statement: Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

FCC Radiation Exposure Statement

The device has been evaluated to meet general RF exposure requirement.

The device can be used in portable exposure condition without restriction.
