- After the base is plugged in and energized, the indicator light will not light up. Press 2 seconds to start heating at a constant temperature of 107°F, while the orange breathing light lights up. The heating stops after 20 minutes, and the orange light goes out after the heating stops.
- After the base is plugged in and energized, Double-click the button to automatically start heating and drying at a constant temperature of 107°F, while the orange color lights up. The heating stops after 60 minutes, and the orange light goes out after the drying stops.
- Long press button to force off heating, drying and indicator light.

Note:

After heated or dried, you need to use your fingers to feel whether the temperature of the soft rubber channel is overheated. If it feels hot, you should let it cool down for 3 to 5 minutes before adding water-based lubricant can be used only to avoid burns or discomfort caused by overheating.

Cleaning and storage

Electronic parts of the product

The head (core electronics) and heated base are not waterproof, so do not wash. It is recommended to use a semi-dry towel to scrub. In order to ensure the service life of the product, you can usually store it in a cool and dry place and do not place it in high humidity or temperature.

Soft Elastomer

1) The soft gel can be removed from the cup and rinsed directly inside the soft gel under the faucet.

2) Do not use cleaning and sanitizing solutions that contain alcohol or corrosive ingredients to clean the soft gel. The gel can be cleaned with a body lotion and then washed with warm or clean water at a temperature of less than 40 degrees Celsius.

3) Soak the soft gel channel cleaning rod in warm water, and after it's moistened, gently insert it into the soft gel channel and brush gently to remove lubricant and residue. Then gently wipe the surface of the channel with a soft cloth to absorb moisture. Lay the soft gel channel in a cool and well-ventilated area to air dry that ensure it is completely dry.

4) Do not use hair dryers or hot air devices to blow-dry the soft gel, as it may cause irreversible damage to the product. After the soft gel is completely air-dried, you can apply specialized utensil care powder on the surface of the soft gel to ensure a dry and smooth product.

5) Please do not place the product in direct sunlight or store it in high-temperature environments (such as leaving it outdoors or in a car exposed to high heat) to prevent material degradation and deformation of the product.

Note: The soft gel is a consumable item. It is recommended to replace the soft gel every 60 uses or every four months (The lifespan varies based on different usage methods). If you notice any cracks in the soft gel, please stop using it immediately to prevent liquid from leaking into the electronics and causing damage.

Precautions

User Group(s)

- This product is only suitable for adults aged 18 and above. To avoid transmitting diseases, please use it for personal use and do not share it with others.
- Do not use this product if you are feeling unwell.
- Individuals using medical electronic devices (such as pacemakers) and anyone who may experience discomfort should not use this product.

Storage and Preservation

- When not in use for an extended period, please fully turn off the product's power before storing it. In very rare cases, if the product's built-in battery naturally deteriorates due to non-use or lack of charging for over six months or an extended period. Please make sure to fully charge the product at least once every 3 months.
- Please do not store the product in direct sunlight or in high-temperature environments (such as leaving it outdoors or in a car exposed to high heat) to avoid the possibility of malfunction, overheating, or fire.
- Please do not disassemble any parts of the product, as it may result in damage or compromise your safety.
- Please do not use any external devices to heat or dry the product, such as microwaves, hair dryers.
- When placing the product in a handbag or briefcase, please put it in your provided storage bag to avoid unnecessary scratches or contact with external bacteria.

Product Electronic Reset

- If you encounter program errors or a situation where certain functions cannot be used, please turn off the product and charge it. That will reset the electronic functions of the product. Then, turn on the product again to resume normal operation.

Product Specification

Product Name:The Titan Masturbator **Product Model:**The Titan-BT

Product Dimensions:309.4x102x100mm **Product Material:**ABS, TPE

Product Weight:1035g **Rated Voltage:**7.4V === **Rated Power:**10W

Built-in Power Supply:Rechargeable Lithium Battery Pack 7.4V 800mAh

Charging Time:Approx. 2-3 hours

Usage Time:About 1h (depending on the use mode)

Product Name:The Titan Masturbator Heating Dock

Rated Voltage:5V === **Rated Power:**10W

※ The electronic components are not waterproof, but the soft gel can be washed with water.

Recycling instructions for the product and components

In order to protect the environment, after the product or its components are discarded, as a responsible consumer, you have the responsibility to separate them from household waste and take them to qualified recycling facilities. These facilities will handle the sorting, disassembly, recycling, and reuse according to local regulations.

※ Before discarding the appliance, it is necessary to remove the batteries from the device.

※ The device must be powered off when removing the batteries.

※ Batteries should be disposed of safely.

After-Sales Service

※ We provide a one-year warranty for the product.

※ After-Sales Service:Please remember your order number and product name, then contact us via email address.

※ If you have any questions during the use of the service, please contact us via email.

※ We will provide you with a satisfactory response within 24 hours.

FCC Warning

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE 1: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

NOTE 2: Any changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
