Pairing instructions:

The first time using Bluetooth earphones, you need to pair the left and right ears first. Pairing method: Open the upper cover of the left and right earphones while taking out the charging compartment, and both ears will flash the power on light once. Wait for 8-10 seconds, Open the Bluetooth on your phone, find the corresponding Bluetooth name, and click on the link (if one side cannot be connected, or if there are two main ears, you need to cancel the pairing connection of the connected earphones and phones. Put both the left and right ears into the charging compartment and switch the phone on and off again. Follow the pairing method to pair and then connect with your phone).

Key point: Plug in the data cable to charge the Bluetooth earphones as soon as you receive them, and use them again after they are fully charged, which can prolong the lifespan of the Bluetooth earphones.

Key point: Do not use super fast charging with a current of 2A or above to avoid damaging the circuit chip due to excessive current. Need to use the supporting data cable for charging, can not use the fast charger.

FCC Warning

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE 1: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

NOTE 2: Any changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
