**calendar:**

**game:**

## Frequently asked questions:

1. I wonder if the Bluetooth connection is successful?

A: When the device pulls down the status bar, the Bluetooth icon is white; when the Bluetooth icon is gray, the Bluetooth is not connected.

2. How to connect to Bluetooth for multiple times?

A: Because there is no uniformity in the Bluetooth protocol of each mobile phone brand, sometimes the Bluetooth connection between the mobile phone and the device is unstable. You can turn off the mobile phone Bluetooth and reconnect it again, or try to connect the device again after restoring the factory Settings.

3. What should I do if I fail to receive the message notice?

A: The device can only synchronize the notification function of the mobile phone, such as mobile phone call, QQ, wechat information reminder, etc. The mobile phone enters "Settings"→ "Application Management", finds "Rights Management", and opens all of them. Enter the Notification Management again, find the RWFit APP, and open all permissions. Open "RWFit APP",→"Device" .→"Message Push", open the background operation authority, and enter the APP for selecting synchronization information notification, such as QQ, WeChat, etc

Tips: If the wechat computer version is online at the same time, the mobile terminal can not receive the letter notice. Some phones also need to add "RW F it APP" to the white list to avoid being turned off when the battery is low.

## Warranty instructions

1. When the product is in normal use, if there are product quality problems caused by manufacturing, materials, design and other reasons, the motherboard will be free warranty, battery and charger for half a year from the date of purchase.

2. Free warranty is not provided for faults caused by personal users, as follows:

    1) Faults caused by unauthorized disassembly and modification of equipment.

FCC Warnning:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection againstharmful interference in a residential installation. This equipment generates, uses and can radiateradio frequency energy and, if not installed and used in accordance with the instructions, maycause harmful interference to radio communications. However, there is no guarantee thatinterference will not occur in a particular installation. If this equipment does cause harmfulinterference to radio or television reception, which can be determined by turning the equipmentoff and on, the user is encouraged to try to correct the interference by one or more of thefollowing measures:

· Reorient or relocate the receiving antenna.

· Increase the separation between the equipment and receiver.

· Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

• Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1)This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 0cm between the radiator and your body.
