

## Multifunctional Light and Sound Power Supply

## FL9-A User Manual

## FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

### RF Exposure Information

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition, compliance with exposure requirements.

This equipment should be installed and operated with minimum distance 0 mm between the radiator & your body.

The brightness of the whole lamp can be reduced, and the brightness is reduced by 25% time you press.

The brightness of the whole lamp can be increased, and the brightness is increased by 25% each time you press.

### Light Mode

Press to turn on warm light mode,press again to warning light mode,press again to turn off light.

### Audio

Press and hold the key for 2 seconds to hear“power on”, press and hold again for 2 seconds to hear “power off”, bluetooth signal is released when booting connected, disconnected, pairing successful, single short press (play/pause) (double click on the key to forcibly disconnect the bluetooth link).

Sound plus button tap to increase volume and hold for 2 seconds to switch to the next track.When turned the maximum volume, a“beep”will be sound.

Sound Reduction button Tap to reduce the volume, hold down for 2 seconds to switch to the previous song.When turned the minimum volume, a“beep”will be sound.

### Multi-Function

When the bluetooth board is powered on, press for 2 seconds to hear the ding dong release signal and prompt tone (TWS function automatically interconnects), (Note: use this function to boot the motherboard long press the interconnect key to hear ding dong, and the other one can be automatically exchanged as long as the bluetooth is turned on (the connected sound will reflect 360° surround medium and high bass), such as inserting the u Disk /TF card and then connecting the mobile phone at the same time, press the button to switch the playback function (hold the button for 2 seconds to forcibly disconnect the bluetooth interconnection sound) if another secondary machine is disconnected, this key operation is invalid, but it can be operated normally when it is not connected.

## Bluetooth Interconnection Method

When two FL9-A devices turn on Bluetooth at the same time, they cannot connect to TWS. Please check whether the mobile phone is connected to two FL9-A at the same time. If two FL9-A are connected, please follow the following steps to cancel the pairing of one of them.

1. Open the bluetooth connection information of the mobile phone. If the connection status of the mobile phone is two, you can click one of them to cancel the pairing.
2. After canceling pairing, long press the TWS pairing button on the operation panel of the host FL9-A for 2S , and the bluetooth of the host FL9-A will ring once, so that the TWS connection and pairing are successful within 3~15S, and the successful TWS voice will be broadcast;
3. Cancel TWS pairing: Double-click TWS button quickly, you will hear the bluetooth signal release sound of the secondary computer.
