- Please ensure the case is not folded back when placing the device on the stand.
- Using a case thicker than 5 mm is not recommended, as it may affect wireless charging performance.
- Compatible with 6.7-inch iPhone models.

## Frequently Asked Question

Q: Which Kindle models are supported by this wireless charging dock?

A: Kindle Paperwhite Signature Edition (2022 & 2024 releases)  
Kindle Colorsoft Signature Edition (2024 release)

Q: Does this wireless charging dock support other devices?

A: Yes, this wireless charging dock is compatible with 6.7-inch iPhone models; however, it is not compatible with tablets.

Q: Is it normal for the Kindle and charging dock to become warm during wireless charging?

A: Mild warmth is normal. If the device becomes excessively hot to the touch, please immediately stop using it and unplug the power. Check the ambient temperature, presence of foreign objects, and whether the adapter is appropriate.

Q: Why is my Kindle charging slowly or not charging when placed on the dock?

A: Please check the following:  
Alignment: Ensure the Kindle is correctly positioned and aligned with the charging dock, as misalignment can reduce charging efficiency.  
Power Adapter: Confirm that a compatible power adapter is used and properly connected.  
Protective Case: Remove any thick or metal-containing cases before charging.  
Foreign Objects: Inspect the charging surface and the back of the device for metal objects such as coins or keys.

## ⚠ Important Safety Instructions

Prior to installation or operation, carefully read the electrical and safety information located at the bottom of this document.

- Prevent the product from being dropped or subjected to impact.
- Do not attempt to disassemble the product.
- Keep the product away from liquids and moisture.
- Operate the product only within ambient temperatures not exceeding 40°C.
- Do not place open flames, such as candles, on or near the product.
- Clean the product exclusively with a dry cloth or soft brush.

Warning: Use only manufacturer-approved accessories and attachments.

## Usage &amp; Recycling

Indoor use only

This symbol indicates that this product shall not be treated as household waste. Instead, it shall be handed over to the applicable collection point for the recycling of electrical and electronic equipment.

### FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radiofrequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

-Consult the dealer or an experienced radio/TV technician for help.  
The FCC certification of this device refers to RF exposure testing performed in typical operating conditions, where a person is no closer than 20 centimeters from the device surface at all times, except for non-repetitive patterns with transient time intervals in the order of a second. Only in the stated conditions, the device is shown to fully comply with the FCC RF Exposure requirements of KDB 447498.
