5. Charging

When the red light of Skyted 320 flashes it means that the battery is low, please charge immediately. Charge for about 2 hours. When the red light turns off and turns to blue, it indicates that the battery is full.

Please, connect the TYPE-C head of the TYPE-C charging cable to the Skyted 320 charging port, and the USB head to the USB charger (car charger, travel charger, computer USB, etc.)

*Note: When Skyted_320 is not in use, please charge it at least once every 2 months.

7. FAQ

A. How to reset the list of paired devices?
In the on state, long press the "volume up button" and "volume down button" for 5 seconds at the same time, and the red and blue lights will stay on for 2 seconds at the same time to clear the pairing record. Skyted_320 will no longer connect to the previously connected devices. When various connection abnormalities occur, you can try to clear the pairing record.

B. What is the paired password?
If you get a password prompt when connecting to Skyted_320, try 0000 (four zeros), 8888 (four eights), 1111 (four ones), or 1234.

C. What power sources can be used to charge the device?
Any power source that provides a DC output of 5V and at least 300mA can be used to charge the Skyted_320. This includes car chargers, travel adapters, computer USB ports, and similar 5V USB power supplies.

8. FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
