05/Warranty Certificate

Warranty Card

Dear user,

- 1.We will offer a two-year free repair or replacement service for any device failure under normal use.
- 2.The term "failure under normal use" generally refers to product defects from the factory or natural wear and tear caused by the user's normal use without intentional or negligent factors, excluding failures or damages due to any improved operation, unauthorized disassembly, or violation of the Precautions for Safe Use.
- 3.In case of any fault of your purchased product, please return it to the Agent in time or contact our after-sales service directly.
- 4.The warranty would be void if the users themselves disassemble or modify the devices within the warranty period.

Thermal Master Technology Co., Ltd.

May 2024

FCC Caution.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

* RF warning for Portable device:

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
