3-IN-1 MAGNETIC WIRELESS CHARGING TRAVEL CASE

USER MANUAL

DEVICE LAYOUT

1. Type-C input
2. Wireless charging for smart watch (Charging pad optimized for Apple Watch only.)
3. Magnetic Wireless Charging Surface (for compatible phones)
4. Wireless charging for earbuds.

SPECIFICATIONS

Type-C input: 9V/2A (Max.)

Wireless output:

- Phone: 5W (Max.)
- Watch: 2.5W (Max.)  
Charging pad optimized for Apple Watch only.
- Earbuds: 2.5W (Max.)

**Note:** Wireless charging option is only possible if the Type-C cable is connected. **Please use an 18W or higher USB-C Adapter (sold separately)**

HOW TO USE CHARGER

Connect the wireless charger to a power adapter using the included Type-C cable. The power adapter should support at least 5V/3A input.

Ensure that all your devices support wireless charging. Place your wireless charging compatible devices on the designated charging areas (2, 3, and 4).

If your smartphone does not support magnetic charging, it's recommended to use the charger in a flat position. Make sure the device is properly aligned with the charging area. Improper placement can result in failed or inefficient charging, which may cause overheating or malfunction.

To use the wireless charging feature in an upright position, fold the middle section inside the travel case into the correct position.

Once devices are fully charged, it is advised to unplug the power adapter from the wall outlet.

FCC Id FCC-ID:2BQNL-2IHQI1025

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:  
(1) This device may not cause harmful interference, and  
(2) this device must accept any interference received, including interference that may cause undesired operation.

COMPATIBILITY:

iPhone 12 and up and other wireless charging compatible devices

WARNINGS

- Some phone cases may block the wireless charging.
- Do not place metal objects (coins, keys, etc.) on the wireless charging
- surface as this may cause overheating and damage the charger and/or your device.
- If the charger becomes excessively hot, disconnect it immediately and allow it to cool down before resuming use. Continuous overheating can damage the charger and connected devices.
- The MagSafe feature will only work with MagSafe-compatible devices.
- Non-compatible devices may not attach securely and could fall off during charging.
- Ensure your smartphone, earbuds, and

iWatch support wireless charging.

FCC Requirement

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy, and if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Package Contents:

- (1) Wireless Charger
- (2) Card inserts
- (1) Charging Cable
- (1) User Manual
