

### 3 in1 Magnetic wireless mobile power

#### Instructions

#### Usage of magnetic suction

(1) The built-in magnet of iPhone 12 and above series can be used directly, and the magnetic protective case can be used directly.

Please use a magnetic protective shell

iPhone 12 and above series phones will have poor magnetic absorption effect when equipped with a protective case with poor magnetic absorption

(2) All mobile phones use a non magnetic protective case and must be attached with a magnetic ring to hold it. Note: Only phones that support wireless charging can be used. The magnetic suction ring must be attached to the center of the phone, otherwise it will overheat and cut off the charge. If not charged, it needs to be removed and repositioned.

The steps for the magnetic coil are as follows:

① Tear off protective film

② Tearing off Double-sided tape

③ Stick the center position of the phone protection case

01

Huawei, Xiaomi, vivo, OPPO, Samsung, iPhone8-11 and other mobile phones that support wireless charging can be magnetic wireless charging by attaching magnetic rings

Note: If the mobile phone protection case does not have a magnetic function, the magnetic ring should be pasted on the outside of the protective case

#### FCC WARNING

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Note: The Grants is not responsible for any changes or modifications not expressly approved by the party responsible for compliance, such modifications could void the user's authority to operate the equipment. The device has been evaluated to meet general RF exposure requirement. This equipment complies with FCC's RF radiation exposure limits set forth for an uncontrolled environment. This device and its antenna(s) must not be co-located or conjunction with any other antenna or transmitter.

02

#### Output Input function view

Magnetic wireless charging supports a maximum of 15W output. The final receiving power of each mobile phone varies

Wireless can support all phones, watches, headphones, tablets, and other charging devices that support wireless charging. Type-C output supports charging for all phones, watches, headphones, tablets, and other devices.

03

#### Usage method

1. Click the button to turn on, double-click the button to turn off. The first use requires clicking the button to activate the self start function. After activation, simply attach the device to the back of the phone to automatically wake up and charge.

2. 3 in1 function display

As shown, This device supports wireless charging for iPhone, Apple Watch and Apple headphones.

3. How to charge two phones at the same time

As shown, Attach the device to the back of the phone for wireless charging. Then use the charging cable to charge the other phone

4. Simultaneous charging and discharging

Use a charger to charge your device, And use the device to wirelessly charge the phone.

04

#### Product Overview

#### Product Parameter

Li-Battery capacity:5000mAh(3.85V / 19.25Wh) Rated capacity:3000mAh(5V=2A)  
Li-Battery capacity:10000mAh(3.85V / 38.5Wh) Rated capacity:6000mAh(5V=2A)

Conversion:  $\geq 60\%$ (5V=2A) Total Output: 20W(Max)

Type-C output: 5V=3A / 9V=2.2A / 12V=1.67A

Wireless charging output: 2.5W / 5W / 7.5W / 10W / 15W

Type-C input: 5V=3A / 9V=2.2A / 12V=1.67A

Product size: (5000mAh) 104\*66\*7.8mm

Product size: (10000mAh) 104\*66\*13.5mm
