USB</div><div>Connect a USB flash drive. USB is for service use only.</div></div><div><div>6. Type-C</div><div>This is a backup port. Connect the Type-C charger to power on the device. However, it is recommended to use the DC adapter.</div></div></div><div>- 1 -</div></div></div>	<div><div>7. DC</div><div>Connect DC adapter to power on the device.</div></div> <div><div>Getting started</div><div><div>Congratulations on your brand new Frameo photo frame!</div><div>If you are new to using Frameo then start by following the Frameo quick setup or follow the on screen guide when powering it on for the first time. Once you have set up your Frameo frame, you can start connecting it to your friends and family.</div></div></div> <div><div>Frameo app</div><div>To send photos to your frame,use the Frameo app for iOS or Android.</div><div><div><div><div>Frameo App</div><div>Instantly Share Photos & Videos</div><div> </div></div><div></div><div>Scan code to find the app</div></div><div><div>Video tutorials</div><div>Check out our "Frameo Tutorials" playlist on YouTube with informative videos where we guide you on how to get started using Frameo. Scan the code to the right or use the link to find the playlist</div><div><div></div><div></div><div>bit.ly/3zktxWX</div></div></div><div>- 2 -</div></div></div>	<div><div>Frameo quick setup</div><div>When starting your frame for the first time, you will need to set up the frame.</div><div><ul style="list-style-type: none">• Select a language. This will be the language used on the Frameo.• Connect your frame to the internet by connecting it to Wi-Fi. Frameo may ask you to update to the latest version. It is recommended to update your frame before continuing if asked to.• Enter your name, and the location where you have placed your frame e.g. "John Doe" and "Living room", "Kitchen" or "Office". Finally set the timezone if not already correct.</div></div> <div><div>Start using Frameo</div><div>Next step is to connect Frameo with your friends and family by providing them with a code from your frame.</div><div>If you want to be able to send photos to the frame yourself, start by downloading the app for iOS or Android on App Store or Google Play. Then use the code to connect your frame and app as described below.</div></div> <div><div>Connecting a new friend</div><div><ul style="list-style-type: none">• Make sure that your friend has downloaded and installed the Frameo app.• Click the add friend icon on your frame . A dialog will appear showing a connection code, which is valid for 12 hours.• Now share this code in whatever fashion you prefer e.g. SMS, E-Mail, IM, phone call, to your friend.• Once your friends have added the code in their Frameo app, they will automatically appear on your frame and be able to send you photos. Read chapter Change options for a friend to allow connected friends, to retrieve and share the connection code via the smartphone app.</div></div> <div>- 3 -</div>	<div><div></div><div><div>Navigating your Frameo</div><div>Swipe left or right to go through your photos.</div><div>To access the menu, simply tap once on the screen.</div><div><div><div><div></div><div>Add friend</div></div><div>This will generate a code that you can share with your friends and family so they can connect and send photos to your frame.</div><div><div></div><div>Power menu</div></div><div>Opens the Power menu.</div><div><div></div><div>React</div></div><div>The React menu can also be accessed by double-tapping on the screen. Tap one of the reactions to let the sender know how it made you feel.</div></div><div><div></div></div><div><div><div></div><div>Hide photo</div></div><div>Hides the current photo. This means that the photo will no longer be shown in the slideshow. If needed the photo can be shown again through the settings menu.</div><div><div></div><div>Gallery</div></div><div>Opens a gallery which allows for easy and fast navigation through your photos.</div></div><div>- 4 -</div></div></div></div>	<div><div><div></div><div>Fit to frame/Fill frame</div></div><div>This toggles how the photo is shown. The Fill frame option is the default. The photo is scaled so that it fills the whole screen.</div><div><div></div><div>Adjust photo</div></div><div>Allows you to adjust the position of the photo in the frame for an even better fit.</div><div>You can use  to edit the caption on imported photos. For received photos, please ask the sender to edit the caption in the Frameo app.</div><div><div></div><div>Interacting with videos</div></div><div>When a video is shown two additional controls are shown. One for play/ pause of the video and one to control the volume level for video sounds.</div><div><div></div><div>Clock and Weather widgets</div></div><div>The current time and weather will appear in the upper-right corner of the frame when the frame has received at least one photo. Tapping either of these will open the weather menu.</div><div><div></div><div>Weather menu</div></div><div>The weather menu contains more detailed weather forecasts and has shortcuts to weather-related.</div><div><div></div><div>External storage menu</div></div><div>When inserting an external storage (e.g. a microSD card) a menu will automatically appear with three options: Press  to play photos directly from the external storage, press  to import photos to the internal memory of your frame or press  to make a backup of your frame. Tap the power icon  to access the power menu. Here you can power off using , restart your frame using  or enter sleep mode using. . Make sure to always use the power off button on the device or in the power menu to turn Frameo off. Never disconnect power when Frameo is running.</div><div>- 5 -</div></div>	<div><div>Settings</div><div>Through the settings, you can personalise your frame to your needs.</div></div> <div><div>My frame</div><div><div>Frame name</div><div>Changes the name of your frame. This is also the name that connected friends and family will see in their list of connected frames in the smartphone app.</div></div><div><div>Frame location</div><div>Changes the location of your frame. This is the location displayed on your friends' and family's list of connected frames which can help to distinguish frames from each other.</div></div><div><div>Set language</div><div>Sets the language used on the frame.</div></div><div><div>Weather location</div><div>Sets the location for the frame's weather feature, ensuring that your frame displays the appropriate weather forecast for you.</div></div><div><div>Temperature unit</div><div>Toggles between the Fahrenheit and Celsius temperature scales.</div></div><div><div>Date</div><div>Sets the date used on the frame.</div></div><div><div>Time</div><div>Sets the time used on the frame.</div></div><div>Frameo will automatically try to set the correct date and time when connected to the internet.</div><div><div>Time zone</div><div>Sets the time zone used on the frame.</div></div><div>- 6 -</div></div>	<div><div>Set first day of week</div><div>Sets which day of the week is considered the first.</div></div> <div><div>Enable/Disable 24-hour format</div><div>Enables, and disables, 24-hour time format.</div></div> <div><div>Manage photos</div><div><div>Show/hide photos</div><div>Select which photos to hide by tapping them. Hidden photos will NOT be deleted from your frame and you can always select them to be shown again.</div><div>Use  to hide or show all photos.</div></div><div><div>Delete photos</div><div>Select photos that you want to permanently delete from your frame by tapping the photo. Use  to select or deselect all and  to permanently delete the selected photos.</div></div><div><div>Import photos</div><div>Allows you to import photos from an external storage (e.g. microSD card). Before you try to import photos, make sure you have an external storage (e.g. microSD card) inserted into your frame with the photos you wish to import.</div><div>Start by selecting the photos that you want to import onto your frame. Once selected tap the import button  to start the import process.</div><div>Use  to select or deselect all photos on the external storage (e.g. microSD card).</div><div>Use  to set the sort order of photos before import and  to order by ascending/descending.</div></div><div><div>Export photos</div><div>Allows you to export photos from the frame to external storage (e.g. microSD card).</div></div><div>- 7 -</div></div> <div><div>THANKS FOR READING</div><div>FCC ID: 2BQTP-RF100</div><div></div><div>Made in China</div></div>
<div>The export function will export all photos on the frame as well as profile pictures.</div> <div><div>Play from external storage</div><div>Enables / disables playback of photos and videos directly from an external storage (e.g. microSDcard) without taking up space on the frame.</div></div> <div><div>My Friends</div><div>This list contains all the connected friends that are allowed to send photos to your frame.</div><div><div>Change options for a friend</div><div>Click the options icon  to open the friend options menu. From here you can allow / disallow if a friend may share the code to the frame. If this is enabled the friend can retrieve and share the code to the frame from his/her app.</div><div>From the options menu you can also delete a friend, by pressing the DELETE FRIEND button. This will remove the friend from the list and thereby remove their permission to send photos to the frame. You will then be asked to confirm the removal and if you would like to remove all photos previously received from this friend.</div></div><div><div>Add person</div><div>To allow a new person to send you photos, simply tap the add friend button  and share the presented code in whatever way you prefer.</div></div><div><div>Display</div><div><div>Brightness level</div><div>Adjust the brightness level of the screen.</div></div><div>- 8 -</div></div></div>	<div><div>Sleep mode</div><div>Frameo offers a sleep mode which turns off the screen to reduce power consumption. The default setting is to turn off the screen at 23:00 and turn on the screen again at 07:00 every day.</div><div>This can be altered by changing your sleep schedule(s). It is possible to have multiple schedules active at once to e.g. have different settings for weekdays and the weekend or a separate schedule to turn off the frame while at work.</div><div>Your frame is not powered down or in standby, so you will still be able to receive photos during sleep mode.</div></div> <div><div>Slideshow</div><div><div>Timer</div><div>Set the duration that a photo should be displayed before showing the next photo.</div></div><div><div>Fill frame</div><div>Set the default frame photo setting. Check to set default to fill which makes the photos fit the device screen according to the most important part of the photo. Uncheck to make the photo fit inside the screen of the device, adding background bars on the sides or top/bottom.</div></div><div><div>Frame background</div><div>Choose between several different frame background options to be shown as bars if the photo does not fill the screen.</div></div><div><div>Photo display order</div><div>Sets the order in which your photos are displayed on the frame.</div><div><ul style="list-style-type: none">• By date taken: Photos are shown in order of when it was taken.• By date received: Photos are shown in order of when it was received.</div><div>- 9 -</div></div></div>	<div><ul style="list-style-type: none">• Shuffle: Photos are shuffled and shown in a random order.</div> <div><div>Reverse photo display order</div><div>Sets if photos are displayed newest to oldest or oldest to newest.</div></div> <div><div>Show caption</div><div>Set whether or not to display the captions that your friends have sent with the photo. Check to display captions. Uncheck to hide captions.</div></div> <div><div>Show clock</div><div>Set whether or not to display the clock widget in the upper-right corner of the slideshow.</div></div> <div><div>Show weather</div><div>Set whether or not to display the weather widget in the upper-right corner of the slideshow.</div></div> <div><div>Autoplay</div><div>Enables/disables autoplay of videos in the slideshow. Videos can always be manually started regardless of this setting.</div></div> <div><div>Video playback</div><div>Determines how videos should be played when autoplay is enabled.</div><div><ul style="list-style-type: none">• Loop videos: The video will loop until the slideshow timer is up.• Play once: The video will play once and show its thumbnail until the timer is up.• Play once and continue: The video will play once and continue to the next photo, or video, once it completes.</div></div> <div><div>Auto mute</div><div>Enable to automatically mute the video volume after a short period of time of not interacting with the frame.</div></div> <div><div>Video volume</div><div>Adjust the volume level for video sounds on the frames.</div><div>- 10 -</div></div>	<div><div>Wi-Fi</div><div>Set which Wi-Fi the frame connects to. If you are connecting to a network with a captive portal.Connection status will say that Wi-Fi login is required and show . Tap this to open a login screen where you can enter credentials to access the network.</div></div> <div><div>Notifications</div><div>Enables/disables whether notifications are shown in the slideshow.</div></div> <div><div>Backup and Restore</div><div><div>Backup frame to external storage (e.g. microSD card)</div><div>Tap to make a backup of your photos, friends and settings. The time of the latest successful backup is also displayed here.</div><div>Any existing backup on the external storage will be overridden!</div></div><div><div>Automatic backup</div><div>If checked, your frame will automatically take a backup within 30 hours of receiving new photos or making changes to your frame.</div></div><div><div>Restore from backup</div><div>Before you attempt to restore your frame, start by confirming that your backup is up-to-date.</div><div>NB: To keep both the old and the new frame operational at the same time after restoring from backup, please make sure that both frames are updated to the latest version beforehand.</div><div>If you wish to restore a backup on a frame that has already been setup, then you must first reset the frame.This will delete all data on the Frameo and reset the Frameo to its setup screen.</div></div><div>- 11 -</div></div>	<div>On the setup screen you can select the "Restore from backup" button which will restore your frame according to the backup.</div> <div><div>Reset frame</div><div>Removes all data from your frame.</div><div>This will permanently remove all your photos, friends/connections and settings.</div></div> <div><div>About</div><div><div>Guide</div><div>Shows the quick start guide, which was shown when you first started the frame.</div></div><div><div>Check for update</div><div>Check if an update is available for your frame.</div></div><div><div>Beta program</div><div>If checked the device will join the Beta program where it will receive updates more frequently and before normal release devices.</div></div><div><div>Share anonymous analytics data</div><div>Sharing anonymous analytics data helps us tremendously to improve the Frameo software. We understand if you do not wish to share this data with us. Keep it checked if you wish to help us improve Frameo. Set unchecked to deny the sharing of anonymous analytics data.</div></div><div><div>Support</div><div>Please visit https://support.frameo.net/hc for FAQ, support and to provide feedback.</div><div>Find contact information for Frameo's support team, and find technical device information. The menu features a special QR code that is there for our support staff to scan. It contains additional device details and</div><div>- 12 -</div></div></div>	<div>information, enabling our support team to efficiently address your specific concerns and provide accurate assistance. Simply take a photo of the QR code and share it with our support staff.</div> <div><div>Privacy</div><div>For more information regarding privacy, please visit http://privacy.frameo.net</div></div> <div><div>Warranty</div><div>One year warranty and we will prompt response within 24 hours. please just contact us http://www.ibestrip.com/</div></div> <div><div>FCC Statement</div><div>This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.</div><div>Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:</div><div>- 13 -</div></div>	<div><div>— Reorient or relocate the receiving antenna.</div><div>— Increase the separation between the equipment and receiver.</div><div>— Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.</div><div>— Consult the dealer or an experienced radio/TV technician for help.</div></div> <div>Note: The Grantee is not responsible for any changes or modifications not expressly approved by the party responsible for compliance. such modifications could void the user's authority to operate the equipment. The device has been evaluated to meet general RF exposure requirement. To maintain compliance with FCC's RF exposure guidelines, the distance must be at least 20 cm between the radiator and your body, and fully supported by the operating and installation configurations of the transmitter and its antenna(s).</div> <div>- 14 -</div>
