

# USER MANUAL

## THE FIRST TIME

- Locate the button on the back of the device.

## WORKING WITH Eyes APP

DigiFind helps users track and retrieve lost valuables as well as manage goods logistics through precise positioning technology.

Please add your device to our independently developed Eyes app. With Eyes, your device can be located using a global network of millions of user devices, while ensuring complete protection of your privacy.

## What You Need

- Eyes APP and Bluetooth enabled.
- A strong Wi-Fi or cellular connection.
- Location Services turned on: `Settings > Privacy&Security > Location Services`.
- For Precision Finding, enable Location Access for Find My: `Settings > Privacy&Security > Location Services`, scroll and tap on Find My, choose While Using the App / Widgets, then enable Precision Location.

## **Add Your Device:**

1. Tap the “Add” icon at the top right corner of the home screen to enter the device addition page.
2. Turn on Bluetooth. The app will automatically scan for nearby unbound devices.
3. Select a device from the list, enter the user name, and tap the “Bind” button.
4. Once successfully bound, the device will appear in the device list on the home screen.

## **If you can't set up your accessory:**

1. Make sure the device' s Bluetooth is turned on and in discoverable mode.
2. Ensure the device is within Bluetooth range of your phone (typically within 10 meters).
3. Try again after restarting the app or your phone' s Bluetooth.

## **If the navigation feature doesn't work**

1. Make sure a map application (such as Amap or Baidu Maps) is installed on your phone.
2. Check if your network connection is working properly.
3. Try again after restarting the app.

## **Warning**

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

This device should be installed and operated with a minimum distance of 20cm between the antenna and all persons.

This device has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This device generates, uses and

can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this device does cause harmful interference to radio or television reception, which can be determined by turning the device off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the device and receiver.
- Connect the device into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment

#### FCC Radiation Exposure Statement

The antennas used for this transmitter must be installed to provide a separation distance of at least 20 cm from all persons and must not be co-located for operating in conjunction with any other antenna or transmitter.
