Overview

J33 earphones are a new generation Bluetooth 5.4 standard that supports binaural calls. They are wireless portable earphones that use smart buttons. The J33 wireless earphones come standard with a charging compartment, providing power range and facilitating long-term use by users.

Problem and Solution

1. How to turn on/off the headphone power?
Open the cabin cover, remove/long press the headphones, and the red and blue light will automatically alternate.
2. How to charge dual-sided headphones?
Put the headphones into the charging box, and the red light on the headphones will automatically charge.
3. How to charge the charging box?
The single digit digital display of the charging box is flashing, and it is 100 when fully charged.
4. How to solve the problem of not being able to use dual-sided headphones at the same time?
Place the headphones into the charging box and open the charging box cover again to automatically reset.

FCC Warning

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE 1: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

NOTE 2: Any changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
