

4-IN-1 Wireless Charger (Foldable) User Manual

I . Product Description

This product is a 4-in-1 fast wireless charger that can wirelessly charge mobile phones/iWatch/TWS Bluetooth headsets that support the Qi standard at the same time. It is a convenient and practical smart electronic device. This product adopts a folding design. The folding method of the product makes it easier to store and carry; when the charging panel is opened, it can charge multiple devices at the same time. Place the device in the charging area to charge the device wirelessly. You can place the phone vertically or horizontally without affecting the charging of the phone. You can video chat or watch your favorite movies while charging.

On/off key, single click to turn on/off the display

M key function definition: Single click: Display 12/24 hour format, switch by single click, long press for 2 seconds: Enter time and calendar settings: Single click M key, switch hour, minute, year, month, day, Adjust time/year, month, day by +- keys.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance

could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

-- Reorient or relocate the receiving antenna.

-- Increase the separation between the equipment and receiver.

-- Connect the equipment into an outlet on a circuit different

from that to which the receiver is connected.

-- Consult the dealer or an experienced radio/TV technician for help.

FCC RF exposure statement:

The equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance between 20cm the radiator your body.
