

## JY258 Product Specification

Product name Clock SpeakerStand

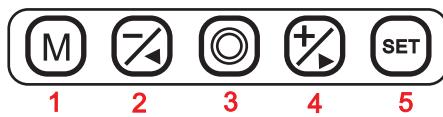

Model . ID JY258B-1

Power rating 5w

Battery size 18650/3.7v

Rated input voltage DC5V/1A

## Key Function Description

## Button Marking

1. Short press to turn off the screen display; long press to switch between Bluetooth/USB playback modes.
2. Short press to decrease the volume; long press to go to the previous track.
3. Long press to power on/off; short press to pause/play; double press to switch between 12H/24H time formats.
4. Short press to increase the volume; long press to go to the next track
5. SET

1. Time setting: Short press to make the hour digits flash, press again to make the minute digits flash, press the +/- keys to adjust and set the time, and finally short press to confirm. (The time will be automatically adjusted to the mobile phone system time when connected to Bluetooth, so no manual setting is needed.)
2. Alarm clock setting: Long press the SET key to enter Alarm A1/A2, press the +/- keys to turn the alarm on or off, press the SET key to select Alarm A1 or A2, set the alarm time via the +/- keys, and finally press the SET key to confirm. The volume of the alarm will gradually increase when it rings, and it will automatically turn off after 2 minutes, or you can press any key to turn it off. Double press the SET key to cancel the alarm.

## Audio function indicator

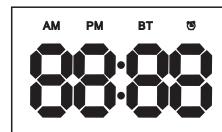

Bluetooth Name: JY-258

## Bluetooth connection method

Open your phone settings ->turn on Bluetooth ->available devices->click JY-258  
(if your phone is already connected to other devices, you need to disconnect first)

## The screen display is as follows:

FCC Warning:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 0cm between the radiator and your body.
