Function introduction
1. Battery power indicator
2. Type C input 5V/3A;9V/2A
   Type C input 5V/3A;9V/2.22A ;12V/1.67A
3. Wireless output 15W(Max) iWatch 2.5W

Operating instructions：

1.Press the power button to display the remaining power
2.Power input and output: Use the power cable to connect the power
adapter to charge the power bank, connect the power bank to charge
the device to be charged through the power cable, or use the wireless
charger to charge the mobile phone and iWatch (the device needs to
support wireless input function).

Technical parameters:

Battery type : Polymer battery
Executive standard: GB/T35590:2017
Capacity : 5000mAh
Input: 5V/3A;9V/2A
Output:5V/3A;9V/2.22A ;12V/1.67A
Wireless output: 15W(Max) iWatch 2.5W
Size::77.5*68*4*17.5mm
Weight: 137g

How to charge for power bank

1. Use the Type C charging cable to charge for power bank.
2. It is recommended to connect the power adaptor to charge for
power bank.
3. It can be connected to the USB port of the computer to charge for
power bank.

FCC Warning

This device complies with Part 15 of the FCC Rules. Operation is subject
to the following two conditions:(1) This device may not cause harmful
interference, and (2) this device must accept any interference received,
including interference that may cause undesired operation.

NOTE 1: This equipment has been tested and found to comply with the limits
for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits
are designed to provide reasonable protection against harmful interference
in a residential installation. This equipment generates, uses and can radiate
radio frequency energy and, if not installed and used in accordance with the
instructions, may cause harmful interference to radio communications.
However, there is no guarantee that interference will not occur in a particular
installation. If this equipment does cause harmful interference to radio or
television reception, which can be determined by turning the equipment off
and on, the user is encouraged to try to correct the interference by one or
more of the following measures:
- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
-Connect the equipment into an outlet on a circuit different from that to which
the receiver is connected.
-Consult the dealer or an experienced radio/TV technician for help.

NOTE 2: Any changes or modifications to this unit not expressly
approved by the party responsible for compliance could void the user's
authority to operate the equipment.

The device has been evaluated to meet general RF exposure requirement.
The device can be used in portable exposure condition without restriction.
