

## Radio frequency radiation exposure evaluation: portable devices

**RESULT :**

**Pass**

### Test Specification

Test item : Wireless mouse  
FCC ID : 2BRCP-SHHANE91  
Test standard : CFR47 FCC Part 2: Section 2.1093  
FCC KDB Publication 447498 D04

Measurement Record:

E.I.R.P = 72.97- 95.2 = -22.23dBm

Since maximum peak output power of the transmitter is -22.23dBm  $\approx$  0.006mW < 3 mW.

Hence the EUT is excluded from SAR evaluation according to FCC KDB Publication 447498 D04
