Smart Air Purifier

• This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used properly, it may cause interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment to an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or a competent radio/TV technician for help.

FCC Radiation Exposure Statement

This equipment complies with FCC radiation exposure limits in conjunction with an uncontrolled environment. This transmitter must not be co-located or operated in conjunction with any other antenna or transmitter.

Exposure to electromagnetic fields (EMF) and radio frequency fields (RF) from this equipment has been evaluated by the manufacturer and found to be within the limits established by the FCC.
