

LED WHIP Light App Guide

01 Download "Magic-Lantern" from the App Store or GooglePlay Store.

02 Open the app and click "ok". If you accidentally click "don't allow", go into your phone's settings and find "Magic-Lantern". Then, allow Bluetooth through your phone's settings. This is essential to connect your phone to your lights.

03 Turn on your phone's Bluetooth. Then, plug in and turn on your LED Atmo-sphere Lights.

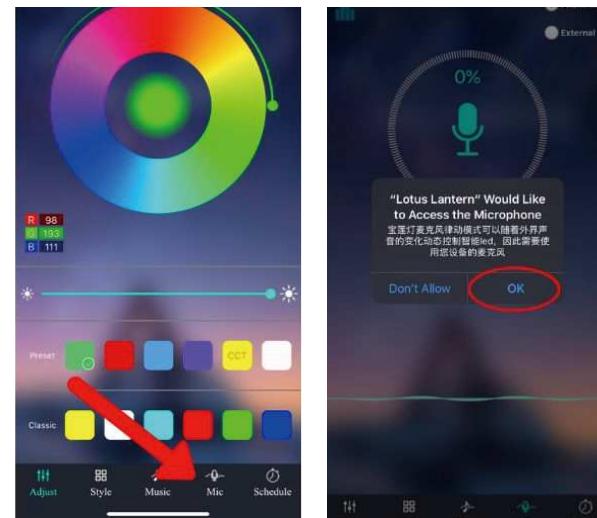

After, click the icon in the top left corner of the app. You should see your lights appear under "my devices" (this may take up to 3 minutes).

Click on your lights to finish pairing them with your app.

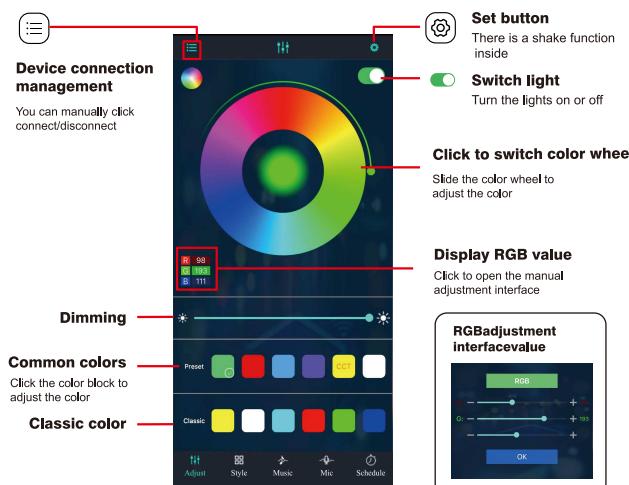

Music Mode

Currently music mode is only available for songs that have been downloaded onto your phone. Apple Music, Spotify, and other streaming services generally do not download songs to your phone. As a solution, you can use the "Mic" mode so that your lights automatically adjust to the sound of music. To use mic mode, click "mic" in the bottom right of the screen. Then, click "OK" to allow the app to access your phone's mic.

LED WHIP LIGHTS CONTROLLED BY LOTUSLANTERN APP

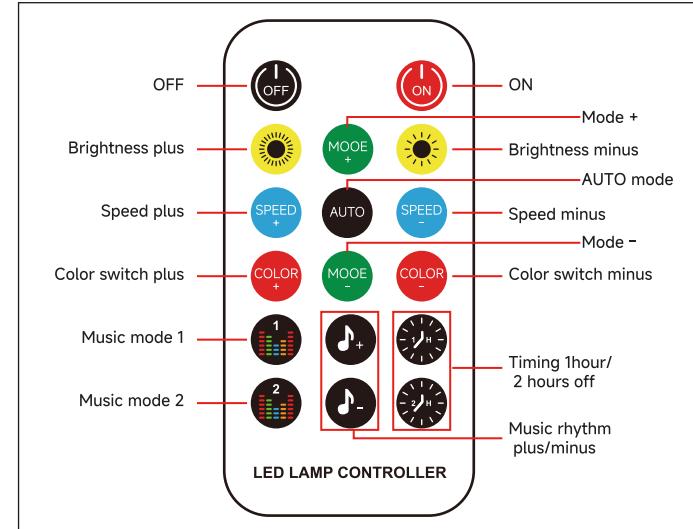

- Works with APP
- Long-range control convenient and quick
- Brightness control from 1% to 100%

If your package includes this remote control, please refer to the following instructions.

LED WHIP LIGHT

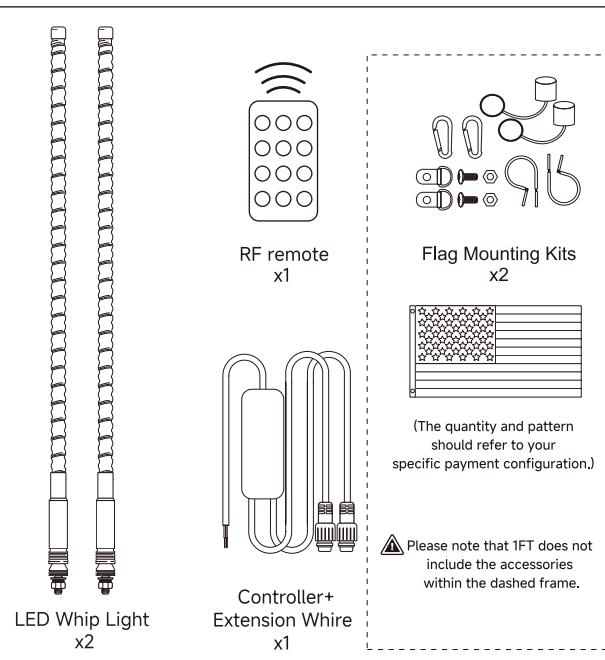

INSTALL AND GUIDE

Includes (2/3/4/5/6 Feet)

Box comes with (single pc)

Box comes with (combo set)

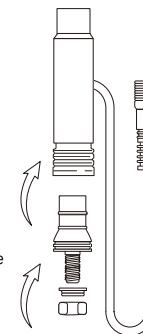

Warning

It is recommended that this installation be performed by a licensed professional. The improper installation of this kit will void all warranties.

PLEASE READ THE FOLLOWING INSTRUCTIONS THOROUGHLY BEFORE INSTALLING AND OPERATING THIS LED WHIP LIGHT

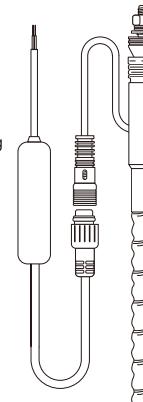

Step 1 Mount Up

- 1 Remove the bottom nut and the spring washer on the bottom of your quick-release mount.
- 2 Mount the LED WHIP LIGHT into any open $\frac{1}{2}$ " bolt mount on your vehicle. Make sure the flat washer is inbetween the whip and the mount.
- 3 Place the spring washer underneath the mount and then screw the bottom nut.
- 4 Have a pair? Go for back to 2 and mount the 2nd whip the same way

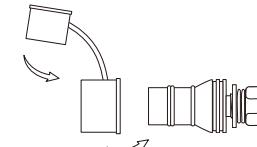

Step 2 Get wired!

- 1 Grab your battery cord and connect it to the bottom hanging cord on your LED WHIP LIGHT
- 2 Have a pair? Connect the 3-prong plug coming out the side of the master LED WHIP LIGHT to the plug coming from the slave LED WHIP LIGHT.
Note: The slave LED WHIP LIGHT cannot function without being connected to the master LED WHIP LIGHT.
- 3 Feed the power cord through to your vehicle battery.
- 4 Connect the terminal wire to the Positive (+) and Negative (-) terminals of your vehicle battery.
- 5 Hide any extra wires with zip ties.

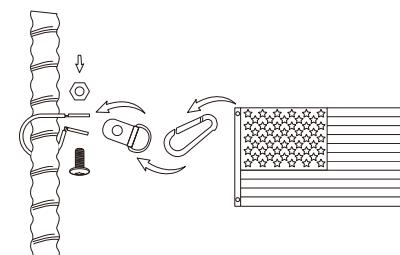

Step 3

When whip is not attached to base, using supplied cap to keep dirt and debris out of connector.

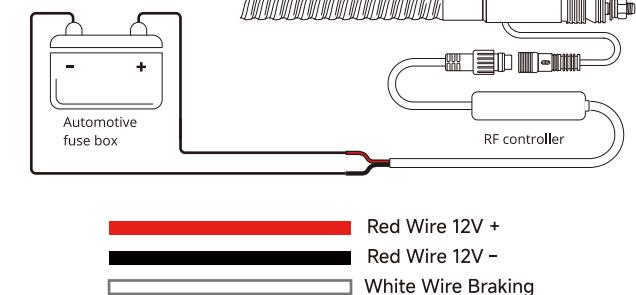

Step 4

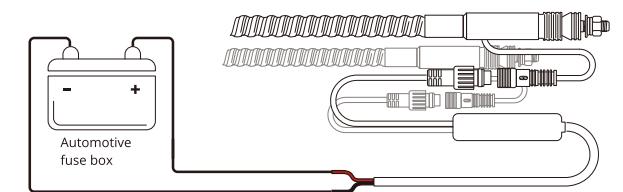

Using the flag mounts to secure flag to the whip.
*1FT whip lights without flag and mounting kit, please ignore this step.

FCC Warning

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE 1: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

NOTE 2: Any changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
