

DUAL-NOZZLE AROMA DIFFUSER

Made in China
Product Model No.: AB-800

Preparation And Installation Before Use

Add Aromatherapy Oils:

- 

1.Open the machine cover from the groove position shown in the diagram to both sides.
- 

2.Take out two machine bottles on the left and right.
- 

3. Please unscrew the top cap of the machine bottle counter-clockwise.
- 

4. Pour the aromatherapy essential oil into the 2 machine bottle. (Do not exceed the maximum capacity scale)
- 

5. Tighten the bottle cap and put the 2 machine bottle back into the machine, and close the machine cover

Wall Mounted

If you need to use it wall mounted, please firmly fix the hanging board in the appropriate position, then align the wall mounting hole of the machine with the hanging board, and then install it on the hanging board. **For better stability, it is recommended to use screws for fixation.**

Connect Bluetooth APP settings

1: Scan the corresponding QR code on the device to download and install the APP, and allow the APP to obtain Bluetooth permissions and location information permissions.

2: Plug in the power and the machine will automatically turn on.

3: Enter the APP and connect the machine.

4: Find the machine name you want to connect to in the [Device list(s)], and then click on the [Not Connected] button after the corresponding name to connect to the machine, as shown in Figure 1. Then the APP page will automatically redirect to the settings page, as shown in Figure 2. (If the machine name cannot be found in the Device List(s), please click [refresh] and keep the Bluetooth distance of the phone and the machine within ten meters.)

5: There are four working modes for you to choose. [SET1 Fresh] [SET2 Moderate] [SET3 Strong] are the fixed mode and cannot be changed.

①:**Fresh Mode (Figure 3):** The left nozzle is designated to work on Monday, Wednesday, Friday and Sunday, and the right nozzle is designated to work on Tuesday, Thursday and Saturday. The start time of both nozzles is 08:00 and the end time is 23:59. During this period, there is a 120-seconds pause after each 20 seconds spray.

②:**Moderate Mode (Figure 4):** The left nozzle is designated to work on Monday, Wednesday, Friday and Sunday, and the right nozzle is designated to work on Tuesday, Thursday and Saturday. The start time of both nozzles is 08:00 and the end time is 23:59. During this period, there is a 120-second pause after each 50-seconds spray.

③:**Strong Mode (Figure 5):** Designate two nozzles to work at the same time every day, The start time of both nozzles is 08:00 and the end time is 23:59, there is a 5-second pause after each 120-seconds spray.

④:**Custom Mode (Figure 6):** Click  Enter the custom setting.

(Figure 6)

⑤:Custom Mode Setting Guide

On this page, you can see (as shown in Figure 7) that the pop-up window under the day of the week allows you to select **[Left Nozzle On]** **[Right Nozzle On]** **[Both On]** **[Close]**. For example, if you select [Left Nozzle On] Monday, it means that only the left nozzle will be set to spray fragrance on Monday, and right nozzle won't work on Monday. **[Both On]** means that both nozzles will work at the same time on Monday, and **[Close]** means that no fragrance will be sprayed on Monday.

Click [Work Cycle]  Enter the time setting (as shown in Figure 8), the start and end times can be set from 00:00 to 23:59. The range of seconds for fragrance spraying work can be set from 5 to 300 seconds, and the range of interval can be set from 0 to 999 seconds. After setting, click **[Confirm]**, then click on the **[Save and Exit]** in the upper right corner, and the machine will start working.

(Figure 7)

(Figure 8)

WARM TIPS:

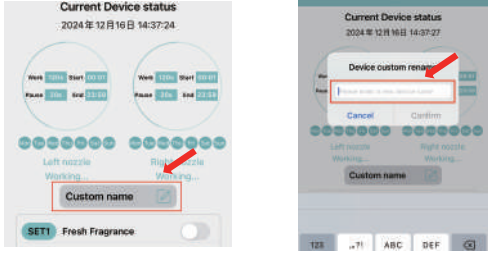

- ①The End Time must be later than the Start Time, otherwise the machine will not be able to recognize and work.
- ②The time of multiple Work Cycles cannot overlap, otherwise the machine will not be able to recognize and work.
- ③How to quickly set up multiple machines?

If you have multiple machines that require unified settings, you can click **[Add to Favorites]**, then connect to other machines, click **[Favorites list]** and apply it directly.

④How to rename my device's factory default name?

During factory inspection, the device will be randomly assigned a name. After completing Bluetooth and App settings, you can set the name of your device according to your own preferences as follow figures.

Panel Setting

After completing the Bluetooth and APP settings mentioned above, you can also directly operate this machine through the control panel

The Control Panel is as follows:

Manual Spray Setting

- ①.Press and hold the [Fresh] button for 1 second, and the machine will automatically enter [SET1 Fresh] mode.
- ②.Press and hold the Moderate button for 1 second, and the machine will automatically enter the [SET2 Moderate] mode.
- ③.Press and hold the [Strong] button for 1 second, and the machine will automatically enter the [SET3 Strong] mode.
- ④.Press and hold the [Custom] button for 1 second, and the machine will automatically enter the [SET4 Custom] mode (consistent with the settings on the App).

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
