

Preface

1. It is strictly forbidden to disassemble the host without authorization, if you need to disassemble it, please hand it over to a professional maintenance point, and the professional will repair it.
2. The pictures in this manual are for a more vivid illustration of how to operate; If there is a discrepancy between the actual product and the picture, please refer to the actual product.
3. There are many types of USB devices, and this unit is not guaranteed to be compatible with all USB devices.
5. It is normal for the system's radio to be affected when passing over bridges, mountains, tunnels and underground parking lots.
6. When driving, please adjust the volume to an appropriate level, as excessive volume will interfere with the driver's listening to information outside the vehicle.
7. Do not perform complex operations while driving to avoid distracting the driver and causing traffic accidents.
8. The navigation system is only used to assist in driving and is required to use the system in accordance with actual traffic rules. If you look at or operate the navigation screen for a long time while driving, you may cause a traffic accident, so be sure to operate the navigation system when parking.

When the system is running and reversing is turned on in any state, the system can automatically switch to the reversing screen, and will switch back to the pre-reversing state after reversing.

Note

Do not rely solely on the reversing rearview system, please check if your surroundings are safe while driving, the reversing rearview system is for assistance only. Due to the limited distance range of the rearview system, driving solely on the reversing rearview system can lead to accidents.

13) 、 Navigation

Customers install and install the map APK by themselves, and navigate by themselves

FCC Warning:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.
