(4) Resetting Lock to Factory Default

When the lock is reset to factory defaults, all user passwords (including the administrator PIN) will be deleted, and all PIN code programming functions will be restored to the original default settings (as shown below).

1. Remove the battery cover.
2. Take off the rear lock case.
3. Reset button (see the picture on the right).
4. Press and hold the reset button for at least 5 seconds. Release the reset button.
5. Install the battery cover.

After resetting, creating the master password is the only available option and must be performed before any other programming of the lock.

Reset Button

Interior Escutcheon

Factory Settings

*The Master PIN code must be registered prior to any other programming of the lock.

Settings	Factory Setting
Master PIN Code	*Needs Registration
Automatic Re-locking	Off
Automatic Re-locking Time	5(Seconds)
Dual Verification Mode	Off
Silent Mode	Off
Vacation Mode	Off
Volume Setting	Off
Language Setting	English
Error Code Entry Limit	5 Times

Usage Instructions

I. Administrator User Management (0 - 4)

1.When entering the system for the first time, user number 0 needs to be registered.
  After entering the main menu again, four administrator users can be continuously registered.

2.To delete an administrator: After verifying the administrator password, enter the
  corresponding number (such as 003) to delete the user with the corresponding number.
  Note that the last administrator user cannot be deleted.

II. Ordinary User Management (5 - 96)

1.To add an ordinary user: Fingerprints or passwords can be directly registered.

2.To add a temporary user: Fingerprints or passwords can be registered. This user can only
  be used once and becomes invalid after use.

3.To delete a user: After verifying the user password, enter the user number (such as 005) to
  delete the corresponding ordinary user. Note that if there are no registered users, this menu
  cannot be entered.

III. Door Lock Settings

1.Function settings:

1.1.Automatic locking setting: After enabling this function, the door will automatically lock at
  a fixed time after being opened. The default time is 5 seconds.

1.2.Automatic locking time setting: The automatic locking time can be set within the range of
  5 - 95 seconds. Adjust by pressing 2 and 5.

1.3.Dual verification mode setting: After enabling it, two ordinary users need to be verified
  before the door can be opened. Administrators are not subject to this restriction.

1.4.Silent mode setting: After enabling it, there will be no sound prompt when unlocking.

1.5.Vacation mode setting: After enabling it, administrators can open the door, but ordinary
  users cannot.

Usage Instructions

2.Volume adjustment: Press 2 and 5 to select the volume. The default is medium volume.

3.Language setting: Chinese or English can be selected.

4.Unlocking direction setting: After clicking, the motor will automatically determine the unlocking direction.

5.Wireless function setting: Click to connect to the APP. (If there is no wireless module, this menu will not be broadcast).

IV. Usage Instructions

1.System power supply: Four AA batteries provide 6V power.

2.User capacity: There are 5 administrator users (0 - 4), 92 ordinary users (5 - 96), and 3 temporary users (97 - 99).

3.To enter the management menu: Press ⏎ and then ☑

4.Initialization state: Enter 123456 and confirm to unlock. Note that during initialization, any fingerprint can unlock the door.

5.System lockout: If there are five consecutive verification failures, the system will flash three red lights and be locked for three minutes.

6.Low battery warning: When the battery power is lower than 4.8V, a warning will be prompted.

Add a Smart Lock in the App

Door Lock Settings → Wireless setting → Connect with wireless device →

① Download the app by scanning the QR code or search for "Smart Life" in the App Store/Google Play. Create a new account or log in with an existing one.

② Add Device

Start the APP, Select "Add Device".

③ Select "Auto Scan", after you find the device, then click "Next".

816
Added successfully
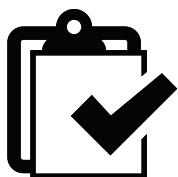

④ After the device is added, click "Done".
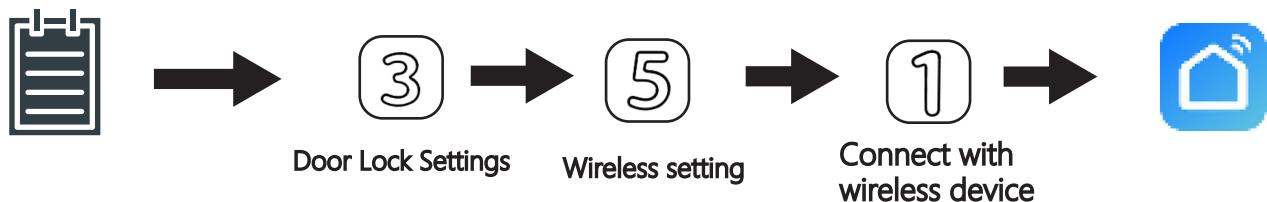

NOTE	If you find that the rotation is opposite to the direction of the door lock, you can click the set icon and set the rotation direction to "anticlockwise unlock".
	The first time you open the door with APP, the device will calibrate the lock position. Please ensure that the device has been properly installed on the door lock.

Connect the lock to the gateway

FCC Warnning:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection againstharmful interference in a residential installation. This equipment generates, uses and can radiateradio frequency energy and, if not installed and used in accordance with the instructions, maycause harmful interference to radio communications. However, there is no guarantee thatinterference will not occur in a particular installation. If this equipment does cause harmfulinterference to radio or television reception, which can be determined by turning the equipmentoff and on, the user is encouraged to try to correct the interference by one or more of thefollowing measures:

• Reorient or relocate the receiving antenna.

• Increase the separation between the equipment and receiver.

• Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

• Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1)This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 0cm between the radiator and your body.
