

Tubes X 25

120° 2-way
connector X 12120° Y
connector X 10

Nylon cable tie X 22

Anchoring X 25

Screws X 25

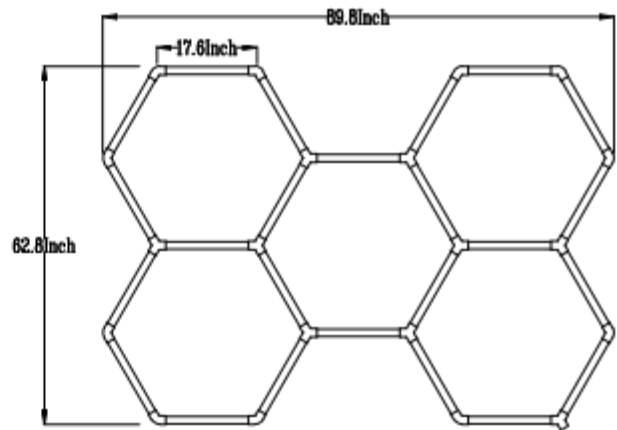

Power cable X 1

Power cable X 1

Nuts X 3

Product Parameters

- ◆ Size: 89.8 X 62.8 X 1.1inch
- ◆ Input Voltage: AC 85V-265V 50/60HZ
- ◆ Working Temperature: -20℃~50℃
- ◆ Beam Angle: 160°

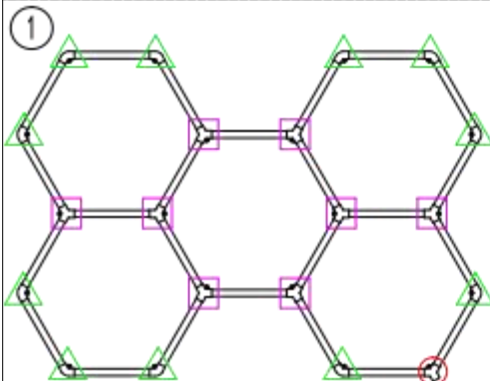

If any problem when you install, send us email to:
serviceled@hotmail.com

Warning

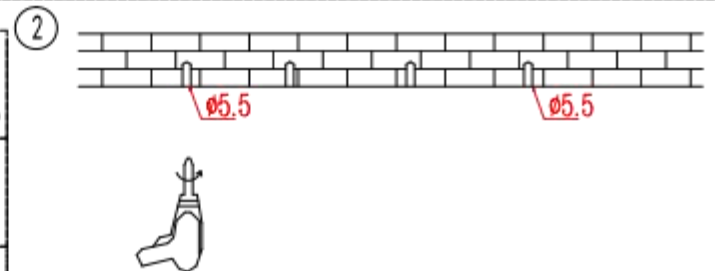

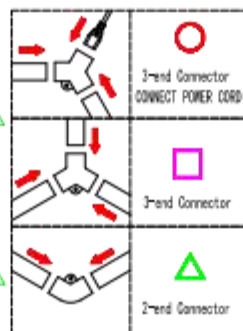

Hexagon garage lights offer the flexibility to be DIYed into various shapes according to your preferences and can be adjusted to fit your garage perfectly. However, kindly use multiple power cords for power supply as required if connecting multiple sets together. It's important to note that one power cord can only connect up to 75pcs 0.4 meters light tubes (approximately 17-18 hexagons). If too many lights by one power cord, it might be burned out.

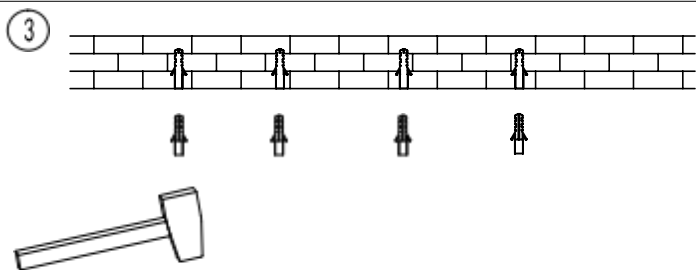

Installation Instructions

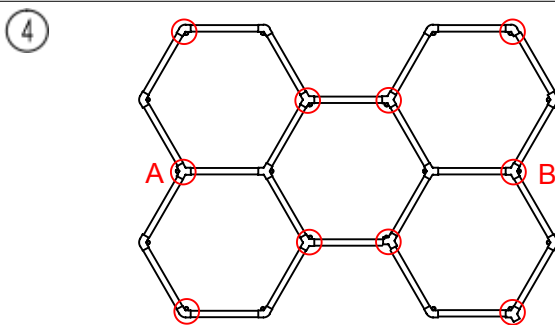

Connecting the light bars with V shape and Y shape connectors as above picture before installing the light to the ceiling

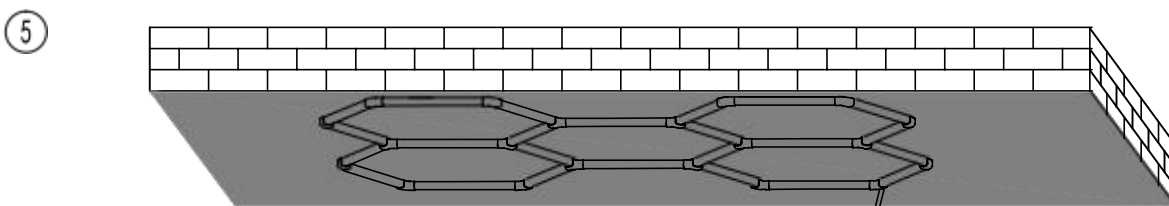

There are screw positions at each corner. Use the installed lights to plan the positions where the screws need to be installed on the ceiling. If the ceiling is a brick-made, you need to drill 5.5mm holes to install anchoring.

Drive the anchoring into the ceiling hole .

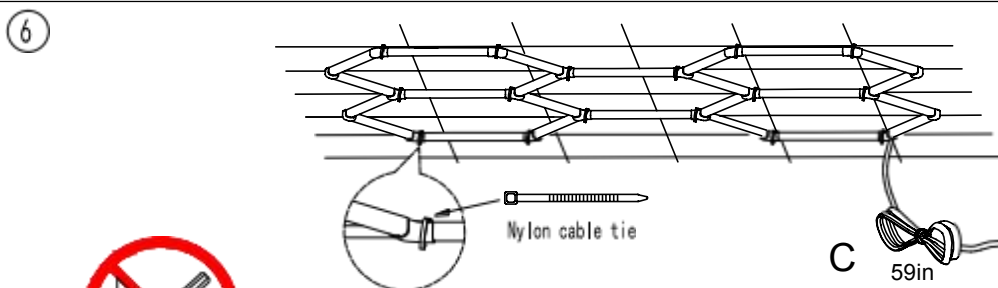

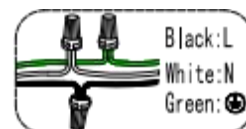

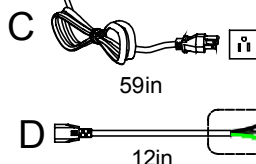

There are screw holes at the corners, we recommend fixing them with screws at least 10 positions, as shown in the picture above; When start installing, it is recommended to install screws at the two positions "A" and "B" in the above figure first, so as to preliminarily fix the lamp.

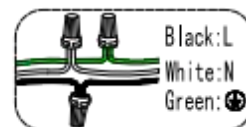

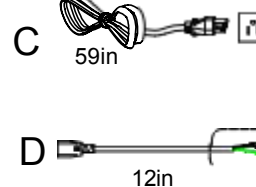

Prohibit live operation

Connecting to the power cable with wire C or wire D as per your request.

Prohibit live operation

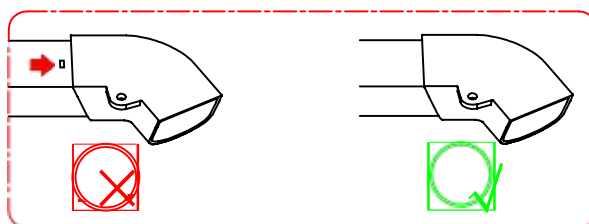

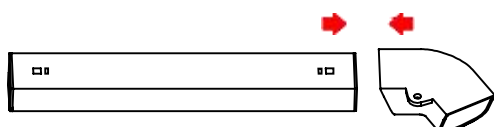

You can use cable ties instead of screws to fix the lights, if there is grid-type ceiling in your room, and then choose the wiring methods that suits you.

Warning

◆ 1. Prohibit live operation

◆ 2. Insert tight enough, cover the mark on light back

◆ 3. If any single light bar broken, just remove the screws nearby, then remove the broken one and replace a new one easily. (We provide a extra light every set)

FCC Warning

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
