## **Preface**

Thank you very much for your choice of this product designed by our company!

Our Mobile Phone complies with the Telecommunication industries standards Europe.

The product described in this guide is approved for use on the GSM networks.

GSM network is a global cellular communications system of international standards.

Allow you to receive an international telephone call used as in your homeland.

However, before using these advanced network functions, you must firstly apply for these required services.

In order to better use your mobile phone, we suggest you to carefully read this statement to know all the functions well.

Note: Due to the cellular network settings and the services provided, some functions may be unavailable, please query local service providers.

### **For your safety**

Read these simple guidelines. Breaking the rules may be dangerous or illegal. Further detailed information is given in this manual.

#### **ROAD SAFETY**

Always keep your hands free to operate the vehicle while driving. Park the vehicle before using your Mobile Phone.

#### **SWITCH OFF IN AIRCRAFT**

Using of wireless telephones in aircraft may disrupt the operation of the aircraft. It is dangerous and illegal. Insure switching off the Mobile Phone before going aboard.

#### **SWITCH OFF IN HOSPITALS**

Follow any restrictions or rules. Switch off the Mobile Phone near medical equipment.

#### **SWITCH OFF WHEN REFUELING**

Switch off the Mobile Phone at a refueling point or any fuel or chemicals

places.

#### SWITCH OFF NEAR BLASTING POINT

Don't use the Mobile Phone where blasting is in progress. Observe restrictions, and follow any regulations or rules.

#### INTERFERENCE

All wireless Mobile Phones may be susceptible to interference, which could affect the performance.

#### USE NORMALLY

Use in the normal position explained in the product documentation. Don't touch the antenna unnecessarily.

#### ENHANCEMENTS AND BATTERIES

Use only the approved enhancements and batteries. Do not connect incompatible products.

#### EMERGENCY CALLS

Ensure the Mobile Phone is switched on and in service. Enter the emergency number, and then press the  key. It will give your location.

Do not end the call until the permission.

## 1 About your Mobile Phone

### 1.1 Appearance

Note :If the specifications subject to change without notice, product images only for reference purposes , so please see the subject produce.

	Model	K2852
	Size	106.5*46.5*13.5mm
	Weight	70g(battery included)
BATTERY	Type	Li-ion battery
	Standard Voltage	3.7 V
	Restrictions on Charging voltage	4.2 V
	Rated capacity	BL-5B ( 600mAh )
CHARGER	Model	K2852
	Input	100-240V
	Output	DC 5.0V
Earphone cable	Specification	3.5mm stereo plug earphone
IO	Specification	Micro USB (5PIN)

## 2 Getting started

### 2.1 The Battery

The Li-ion battery can be charged and discharged hundreds of times. Please use the approved batteries, and only use the battery charger approved by the Mobile Phone producer to charge your battery.

#### 2.1.1 Install & remove a battery

##### **Remove:**

- (1) Slide forward the bottom off the back cover to remove.
- (2) Lift the battery from its slot and take it out.

##### **Install:**

- (1) Place the battery into the battery slot.
- (2) Raise the back cover from the slot between battery cover and rear housing.

**Warning:**

- (1) There may be the risk of explosion if the battery is replaced by the wrong type.
- (2) Dispose of used batteries according to the guidelines.

### **2.1.2 Charging**

To plug in the power charger, the charger cable plug at the bottom of the Mobile Phone

**Note:**

- 1. It is beneficial to the battery to charge it until full at the first three times.
- 2. When charging, don't remove or take out off the battery to avoid the

battery circuit to burn out.

3. While charging, it is normal that the Mobile Phone and charger will become hot.
4. If the battery is completely empty, it may take a period of time before the charging icon appears on the display.

**Warning: Provides charging temperature range -5 °C to 55 °C, over this range, please do not use the charging equipment. And be sure to use the charger provided by the supplier. Use of an unapproved charger may be dangerous and breach of warranty of the equipment approval and terms.**

**Notice:**

The socket-outlet shall be installed near the equipment and shall be easily accessible.

## **2.2 SIM card installation**

Turn off the Mobile Phone, and take out the battery.

Keep the gold color side of the SIM card downward, and slide it gently to the right place.

### **2.3 Memory card installation**

Power off the Mobile Phone, and take out the battery or any other electrical supply.

Keep the golden color side of the Memory card downward, and push it gently to the right place.

Before take out off the memory card, be sure to Power off the Mobile Phone and remove the battery first.

Use the USB cable for connection to a PC to exchange data from or to the memory card in the Phone.

## 2.4 Storage Management

Manage the memory card storage space.

### 1. The computer and synchronize

Note: This Mobile Phone supports USB boot function; all operations are on the computer need to use the card reader.

You can enter after the discovery has a number of preset folders, for normal use, set the relevant documents were deposited with the corresponding directory, that is, which corresponds to MP3 folder My music, photos corresponding album Folder, corresponding folders, pictures corresponding Images folder. Sound recording, self-Tone Audio corresponding folder.

- **Name**

Bluetooth devices revealed that the Device name, address Bluetooth devices, supported services and other information.

- **Advanced**

Connect with BT headset. User can select storage position under it.

#### **4.4.7      Restore Factory settings**

You can reset some of the Mobile Phone settings to their original values by input Mobile Phone lock password (1122).

## **4.5 Phonebook**

You can store the information in phonebook like name, phone number etc.

The phone number can be stored in Mobile Phone or SIM card.

Press right soft key to enter phonebook in standby mode. Select a number, then you can use the SIM to play IP Dial, Send SMS, view, edit, delete.

### **4.5.1 Contacts**

You can store the information in contacts like name, phone number etc.

The phone number can be stored in Phone memory or SIM card.

To do the options as follow:

View: View the contacts

Send text message: Send SMS to the contacts

Call: Make a call to the contacts

Edit: Edit the contacts

Delete: Delete the contacts

Copy: Copy the contacts to phone, SIM cards

Send business card

Add to Blacklist

Mark several: Mark the contacts then you can delete

Phonebook setting

#### **4.5.2 Add new contact**

Add a new record to Mobile Phone or SIM cards

If add a new record to Mobile Phone, you can input name, number, home number, company name, email address, office number, fax number and Birthday. Beside these, you can set items as following:

#### **4.5.3 Delete ALL Contacts**

**-From SIM:** Delete all the record from SIM card.

**-From Mobile Phone:** Delete all the record in Mobile Phone.

#### **4.5.4 Copy All**

**-From SIM:** Duplicates the SIM numbers to Mobile Phone.

**-From Mobile Phone:** Duplicates the Mobile Phone numbers to SIM card.

#### **4.5.1 Move All**

**-From SIM:** Move the SIM numbers to Mobile Phone.

**-From Mobile Phone:** Move the Mobile Phone numbers to SIM card.

#### **4.5.2 Preferred Storage**

Set the storage place for record. User can also set it while save the record.

#### **4.5.3 Memory Status**

User can query the memory capability and already used capability in phonebook of Mobile Phone or SIM card.

### **4.6 User profiles**

User Profiles define how your Mobile Phone reacts when you receive a call or a message, how your keypad sounds when you press a key, and more. Each of the available profiles can be left at their default setting or customized to suit your needs. Select and customize the most suitable profile for your situation. The available modes are General, Silent, Meeting & Outdoor.

In standby mode, you can press and hold key # to switch between meeting mode and previous mode.

### **4.7 Call history**

Select call center from main menu, you can view the information about

call history and the general call settings.

## **4.8 Fun & Game**

There are “F1 race ” game in phone. Please refer to help option of the game for specific operation and instructions.

Game settings:

BGM: To turn on/off the game background music.

Sound effect: To turn on/off the sound effect.

Vibration: To turn on/off the vibration effect.

Volume: To set the game sound.

## **5 Battery information**

Your device is powered by a rechargeable battery.

The battery can be charged and discharged hundreds of times but it will eventually wear out. When the talk and standby times are noticeably shorter than normal, please buy a new battery.

Use only the approved batteries, and recharge your battery only with approved chargers designated for this device.

Unplug the charger from the electrical plug and the device when not in use.

Do not leave the battery connected to a charger. Overcharging may shorten

its lifetime.

If the phone is overused at low battery when charging, there might need a longer time for the charge indicator to be shown on the screen.

**Warning**

Do not drop, knock, or shake the device. Rough handling can shorten the life of the battery.

Do not make short-circuit occur to the battery.

The battery put in hot or cold places, such as in a closed car in summer or winter, will reduce the capacity and lifetime of the battery.

Do not put the battery near flammable or explosive goods.

Do not dispose of batteries in a fire!

Never use any charger or battery that is damaged.

Use the battery only for its intended purpose.

Dispose of batteries according to local regulations. Please recycle when possible. Do not dispose as household waste.

## **6 Safety information**

### **6.1 Operating environment**

Remember to follow any special regulations in force in any area and always switch off your device when its use is prohibited or when it may

cause interference or danger. Use the device only in its normal operating positions. Do not keep the device near credit cards and other magnetism medium, some accessories can bring magnetism that may be delete the data.

## **6.2 Electronic devices**

Some electronic devices are not adequately shielded from external RF energy.

### **6.2.1 Pacemaker**

Pacemaker manufacturers recommend that a minimum separation of 6in (20cm) should be maintained between a wireless Mobile Phone and a pacemaker to avoid potential interference with the pacemaker. These recommendations are consistent with the independent research by and recommendations of Wireless Technology Research. To minimize the potential interference, persons with pacemakers should do as below:

Always keep the device more than 6 in (20 cm) from their pacemaker when the device is switched on.

Not carry the device in a breast pocket.

Hold the device to the ear opposite the pacemaker.

If you have any reason to suspect that interference is taking place, switch

off your device immediately.

### **6.2.2 Hearing aids**

Some digital wireless devices may interfere with some hearing aids. If interference occurs, consult your service provider.

### **6.2.3 Other medical devices**

Operation of any radio transmitting equipment, including wireless Mobile Phones, may interfere with the functionality of inadequately protected medical devices. Switch off your Mobile Phone in health care facilities when any regulations are posted in these areas instructing you to do so.

### **6.2.4 Vehicles**

RF signals may affect improperly installed or inadequately shielded electronic systems in motor vehicles. For more information, check with the manufacturer or its representative of your vehicle or any equipment that has been added.

### **6.3 Potentially dangerous situations**

Switch off your device when in any area with a potentially explosive atmosphere and obey all signs and instructions. Sparks in such areas could cause an explosion or fire resulting in body injury even death.

Switch off the device at refueling points such as near gas pumps at service stations. Observe restrictions on the use of radio equipment in fuel depots, storage, and distribution areas, chemical plants or where blasting operations are in progress.

Areas with a potentially explosive atmosphere are often but not always clearly marked. They include below deck on boats, chemical transfer or storage facilities, vehicles using liquefied petroleum gas (such as propane or butane), and areas where the air contains chemicals or particles such as grain, dust or metal powders.

## **7 Care and maintenance**

Your device is a product of superior design and craftsmanship and should be treated with care. The suggestions below will help you protect your warranty coverage and enjoy your device for many years.

Keep your Mobile Phone and all accessories out of the reach of small children.

Keep the device dry.

Do not use or store the device in dusty, dirty areas. Its moving parts and electronic components can be damaged.

Do not store the device in hot areas. High temperatures can shorten the life of electronic devices, damage batteries, and warp or melt certain plastics.

Do not store the device in cold areas. When the device returns to its normal temperature, moisture can form inside the device and damage electronic circuit boards.

Do not attempt to open the device other than as instructed in this guide.

Do not drop, knock, or shake the device. Rough handling can break internal circuit boards and fine mechanics.

Do not contact the device by wet hands, the electric current may strike and damage it.

Precipitation, humidity, and all types of liquids or moisture can contain minerals that will corrode electronic circuits.

Do not use harsh chemicals, cleaning solvents, or strong detergents to clean the device.

Do not paint the device. Paint can clog the moving parts and prevent proper operation.

All of the above suggestions apply equally to your device, battery, charger, or any enhancement. If any device is not working properly, take it to the nearest authorized service facility for service.

- This manual is accurate when issued. The actual specific content to the mobile phones.
- The Company reserves the right to modify technical specifications without notice.
- Some of the contents of the manual may be different with the phone, according to the software, SIM card and service provider to decide.

FCC Statement:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
