## Legal Information

PLEASE READ THIS INFORMATION BEFORE USING THE PHONE TO MAKE A BETTER USE OF YOUR PHONE. WE ARE NOT RESPONSIBLE FOR ANY DAMAGE DUE TO YOUR MISUNDERSTANDING OF THIS INFORMATION AND MISACTTING.

We are endeavoring to improve our products and services and we reserve all the rights to revise and change the description of this product and its software as well as this user's manual without obligation to notify any person of such revisions and changes.

This user's manual is for your better use of this phone not an approval of any accessories. All the pictures in this manual are for reference only. There may be slight difference between the appearance of phone and keys and contents of display used in this manual and those of your phone. Please refer to your phone for actuality. Some features introduced in this manual are network or subscription-dependent features. Please contact your service provider.

### Important Notice

#### Important Safety Precautions

Do not use the device while driving. In some countries, it is illegal to use such devices while driving.

Switch off when refueling. Do not use the device at a refueling point (service station) or near fuels or chemicals.

Switch off in aircraft. Mobile phones and GSM devices can cause interference. Using them on aircraft is both illegal and dangerous.

#### Follow Special Regulations

Special Regulation. Follow any special regulations in force in any area and always switch off your device whenever it is forbidden to use it, or when it may cause interference to the surrounding.

Radio Interference. All mobile phones cause radio interference

within the specified limits of GSM standards.

Qualified service. Only qualified service personnel must repair the equipment. Use only approved accessories and batteries.

Emergency calls. Ensure that the phone is switched on and in service. Enter the emergency number (100 or another official emergency number) and press the "Dial" key.

Use only approved accessories. The use of any other power accessory will violate warranty conditions that apply to the phone.

#### Safe Operation Instructions

Before Installing or operating this product, read this manual carefully.

Do not expose unit to rain or moisture.

Do not place unit on or close to any heat source.

## 2 Getting started

### 2.1 The Battery

Your device is powered by a rechargeable battery.

The battery can be charged and discharged hundreds of times but it will eventually wear out. When the talk and standby times are noticeably shorter than normal, please buy a new battery.

Use only the approved batteries, and recharge your battery only with approved chargers designated for this device.

Unplug the charger from the electrical plug and the device when not in use. Do not leave the battery connected to a charger. Overcharging may shorten its lifetime. If left unused, a fully charged battery will lose its charge over time.

**Warning**

Do not drop, knock, or shake the device. Rough handling can shorten the life of the battery.

Do not make short-circuit occur to the battery.

The battery put in hot or cold places, such as in a closed car in summer or winter, will reduce the capacity and lifetime of the battery.

Do not put the battery near flammable or explosive goods.

Do not dispose of batteries in a fire!

Never use any charger or battery that is damaged.

Use the battery only for its intended purpose.

Dispose of batteries according to local regulations. Please recycle when possible. Do not dispose as household waste.

### 2.1.1 Install & remove a battery

**Remove:**

- (1) Slide forward the bottom off the back cover to remove.
- (2) Lift the battery from its slot and take it out.

**Install:**

- (1) Place the battery into the battery slot.
- (2) Slide the back cover toward the top of the Mobile Phone to lock the cover into its place.

**Warning:**

There may be the risk of explosion if the battery is replaced by the wrong type.

Dispose of used batteries according to your guidelines.

### 2.1.2 Charging

To plug in the power charger, the charger cable plug at the bottom of the Mobile Phone

**Note:**

1. It is beneficial to the battery to charge it until full at the first three times.
2. When charging, don't remove or take out off the battery to avoid the battery circuit to burn out.
3. While charging, it is normal that the Mobile Phone and charger will become hot.
4. If the battery is completely empty, it may take a period of time before the charging icon appears on the display.

Warning: Provides charging temperature range -5 °C to 55 °C, over this range, please do not use the charging

equipment. And be sure to use the charger provided by the supplier. Use of an unapproved charger may be dangerous and breach of warranty of the equipment approval and terms.

Notice:

The socket-outlet shall be installed near the equipment and shall be easily accessible.

## **2.2 SIM card installation**

Turn off the Mobile Phone, and take out the battery.

Keep the gold color side of the SIM card downward, and slide it gently to the right place.

## **2.3 Memory card installation**

Power off the Mobile Phone, and take out the battery or any other electrical supply.

Keep the golden color side of the Memory card downward, and push it gently to the right place.

# 5 Safety information

## 5.1 Operating environment

Remember to follow any special regulations in force in any area and always switch off your device when its use is prohibited or when it may cause interference or danger. Use the device only in its normal operating positions. Do not keep the device near credit cards and other magnetism medium, some accessories can bring magnetism that may be delete the data.

## 5.2 Electronic devices

Some electronic devices are not adequately shielded from external RF energy.

### 5.2.1 Pacemaker

Pacemaker manufacturers recommend that a minimum separation of 6in (20cm) should be maintained between a wireless Mobile Phone and a pacemaker to avoid potential interference with the pacemaker. These recommendations are consistent with the independent research by and recommendations of Wireless Technology Research. To minimize the potential interference, persons with pacemakers should do as below:

Always keep the device more than 6 in (20 cm) from their pacemaker when the device is switched on.

Not carry the device in a breast pocket.  
Hold the device to the ear opposite the pacemaker.  
If you have any reason to suspect that interference is taking place,  
switch off your device immediately.

### **5.2.2 Hearing aids**

Some digital wireless devices may interfere with some hearing aids. If interference occurs, consult your service provider.

### **5.2.3 Other medical devices**

Operation of any radio transmitting equipment, including wireless Mobile Phones, may interfere with the functionality of inadequately protected medical devices. Switch off your Mobile Phone in health care facilities when any regulations are posted in these areas instructing you to do so.

### **5.2.4 Vehicles**

RF signals may affect improperly installed or inadequately shielded electronic systems in motor vehicles. For more information, check with the manufacturer or its representative of your vehicle or any equipment that has been added.

## **5.3 Potentially dangerous situations**

Switch off your device when in any area with a potentially

explosive atmosphere and obey all signs and instructions. Sparks in such areas could cause an explosion or fire resulting in body injury even death.

Switch off the device at refueling points such as near gas pumps at service stations. Observe restrictions on the use of radio equipment in fuel depots, storage, and distribution areas, chemical plants or where blasting operations are in progress.

Areas with a potentially explosive atmosphere are often but not always clearly marked. They include below deck on boats, chemical transfer or storage facilities, vehicles using liquefied petroleum gas (such as propane or butane), and areas where the air contains chemicals or particles such as grain, dust or metal powders.

## **6 Care and maintenance**

Your device is a product of superior design and craftsmanship and should be treated with care. The suggestions below will help you protect your warranty coverage and enjoy your device for many years.

Keep your Mobile Phone and all accessories out of the reach of small children.

Keep the device dry.

Do not use or store the device in dusty, dirty areas. Its moving parts and electronic components can be damaged.

Do not store the device in hot areas. High temperatures can shorten the life of electronic devices, damage batteries, and warp or melt certain plastics.

Do not store the device in cold areas. When the device returns to

its normal temperature, moisture can form inside the device and damage electronic circuit boards.

Do not attempt to open the device other than as instructed in this guide.

Do not drop, knock, or shake the device. Rough handling can break internal circuit boards and fine mechanics.

Do not contact the device by wet hands, the electric current may strike and damage it.

Precipitation, humidity, and all types of liquids or moisture can contain minerals that will corrode electronic circuits.

Do not use harsh chemicals, cleaning solvents, or strong detergents to clean the device.

Do not paint the device. Paint can clog the moving parts and prevent proper operation.

All of the above suggestions apply equally to your device, battery, charger, or any enhancement. If any device is not working properly, take it to the nearest authorized service facility for service

FCC Statement:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

## FCC RF Exposure Information and Statement

The SAR limit of USA (FCC) is 1.6 W/kg averaged over one gram of tissue.

Device types: T303, K3050B (FCC ID: A2DA2T303G) has also been tested against this SAR limit. The highest SAR value reported under this standard during product certification for use at the Head is 0.574 W/kg and when properly worn on the Body is 0.608 W/kg. This device was tested for typical body-worn operations with the back of the handset kept 15 mm from the body.

To maintain compliance with FCC RF exposure 1.5 cm requirements, use only accessories that maintain a 1.5cm separation distance between the user's body and the back of the handset. The use of belt clips, holsters and similar accessories should not contain any metallic components in its assembly. The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided.
