

# WIRELESS THERMOMETER

FT004

## Instruction Manual

### Inventory of content

1. The indoor station (FT004R)
2. The remote sensor (FT004T)
3. Instruction Manual

### Function:

- Indoor temperature
- Outdoor temperature

### Quick Setup

**Note:** Use good quality Alkaline batteries and avoid rechargeable batteries

1. Place the batteries into the remote sensor first then into the indoor station. The indoor/outdoor temperature will be displayed in indoor station.
2. If there is no temperature reading in the indoor station, make sure the units are within range of each other or repeat the battery installation procedure. **Wait 10 seconds before re-insert the battery again to make a proper reset.**

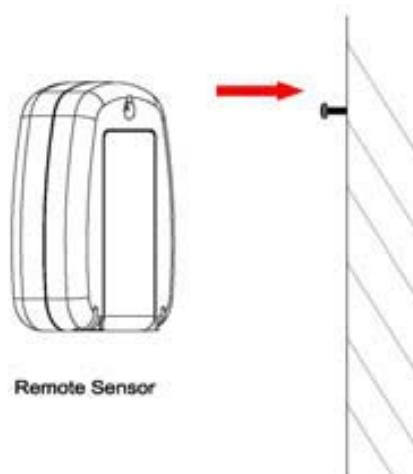

### Caution

- Do not reverse polarity of the batteries
- Do not put receiver close to metal

### How to fix outdoor sensor

**Note:** To achieve a true temperature reading, avoid mounting in direct sunlight. We recommend that you mount the remote sensor on an outside North-facing wall; obstacles such as walls, concrete, and large metal objects will reduce the range.

To wall mount, use a screw to affix the back case of the remote sensor .

## FCC STATEMENT

### **Part 15.19**

1. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference.
- (2) This device must accept any interference received, including interference that may cause undesired operation.

### **Part 15.21**

2. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

### **Part 15.105**

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

Reorient or relocate the receiving antenna.

Increase the separation between the equipment and receiver.

Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

Consult the dealer or an experienced radio/TV technician for help.
