Attention: Mark Neumann

Dear Mark:

Modifications were made to the Adaptrum ACRS 1.0 radio (FCC ID: A2UACRS10) during the UL CCS certification testing to meet FCC Part 15 Subpart H rules including:

- 1) A K&L Microwave notch filter model 5N40-611/E16.2-0/0 was added to RF output.
- 2) Ferrite beads were added to the radio power cord.

Adaptrum will incorporate these modifications into the final ACRS 1.0 radio. Specifically, the notch filter will be installed on the RF output connector inside radio enclosure. The ferrite beads will be attached to the power cord and shipped with each radio unit.

Sincerely,

/S/

Stuart Rumley  
VP of Engineering  
Adaptrum, Inc.
