Subject: Class II Permissive Change to Class B Computing Device Peripheral
FCC ID: A3KM076 / Dell 17" Color Monitor, Model E771p

Gentlemen:

Enclosed, please find Philips Electronics Industries (Taiwan) Ltd.'s application for equipment authorization dated September 2, 2000. The subject device was originally application was granted on January 21, 1997 in compliance with Part 15, Subpart B of the FCC Rules.

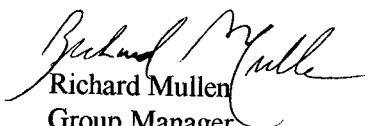

This device was originally reported as 17" Digital Autoscans Color Monitor provided with such features as: (1) 30-86 kHz horizontal, 50-160 Hz vertical sync frequencies and maximum resolution up to 1280x1024, Non-Interlaced; (2) 1.8m detachable non-shielded power supply cord; (3) 1.8m permanently attached shielded D-Sub connector signal cable with two external bonded ferrite cores; (4) audio power amplifier with built-in speaker and (5) microphone and headphone jacks for multimedia applications.

This Class II Change is to report: (1) decrease horizontal sync frequency to 30-70 kHz with same maximum resolution up to 1280x1024, Non-Interlaced; (2) delete audio power amplifier with built-in speaker (3) delete microphone and headphone jacks; (4) new front and back cabinet; (5) change signal output interface cable to two internal ferrite cores on inside the enclosure and one external ferrite core on the outside enclosure near the 15-Pin D-Sub connector; and (6) new CRT with and improved video printed circuit board.

This EUT was system tested in accordance with C63.4-1992 to show compliance to FCC Part 15 Class B limits. Compliance tests were performed in two representative worst-case video modes 1024x768 @ 68.7 kHz and 1280x1024 @ 60 kHz.

Should you have any questions or comments, please contact the undersigned who is an authorized agent for the subject application. Thank you for your attention and cooperation in this matter.

Sincerely yours,

Richard Mullen
