Ref: FCC Class II Permissive change for FCC ID: A4RG8V0U
(Original Grant date: 9/20/2021)
Applicant: Google LLC, Grantee Code: A4R

The undersigned hereby requests a Class II permissive change for FCC ID: A4RG8V0U, originally granted on 9/20/2021.

- 1) Addition of support of additional 50MHz channel BW for bands n258, n260, n261: These changes do not require hardware changes, only software changes related to the addition of 50 Mhz BW. The FR2 radio parameters for bandwidths *other than* 50 MHz BW remain unchanged. All other radios and their SW settings remain identical to the original filing. Details can be found in the attached exhibits. The inclusion of the 50MHz bandwidth in FR2 operation does not impact the power management for RF exposure, and the assessment for power density in the original filing remains representative and covers the additional 50MHz bandwidth.

If you have any questions regarding this application, please feel free to contact me.

Sincerely Yours,

Clarence Ip
