

CBP verify with frequency domain plots

The device does not support channel puncturing with regards to Contention Based Protocol.

The entire bandwidth 160MHz stops transmission after the incumbent signal appears.

Before incumbent injected on 160MHz channel

After 10MHz incumbent injected on center of channel, the entire 160MHz bandwidth stops transmission.

After 10MHz incumbent injected on bottom of channel, the entire 160MHz bandwidth stops transmission.

After 10MHz incumbent injected on top of channel, the entire 160MHz bandwidth stops transmission.
