

Appendix A. Test Setup Photos

The equipment under test was placed on a desk inside of shield room. The isotropic field probe was used to measure the field strength for 6 EUT surfaces, and during measurement a separation of 20cm for position A and B, 15cm for position C/D/E/F is maintained between EUT surface and the center of the field probe.

Position A

Position B

Position C

Position D

Position E
