

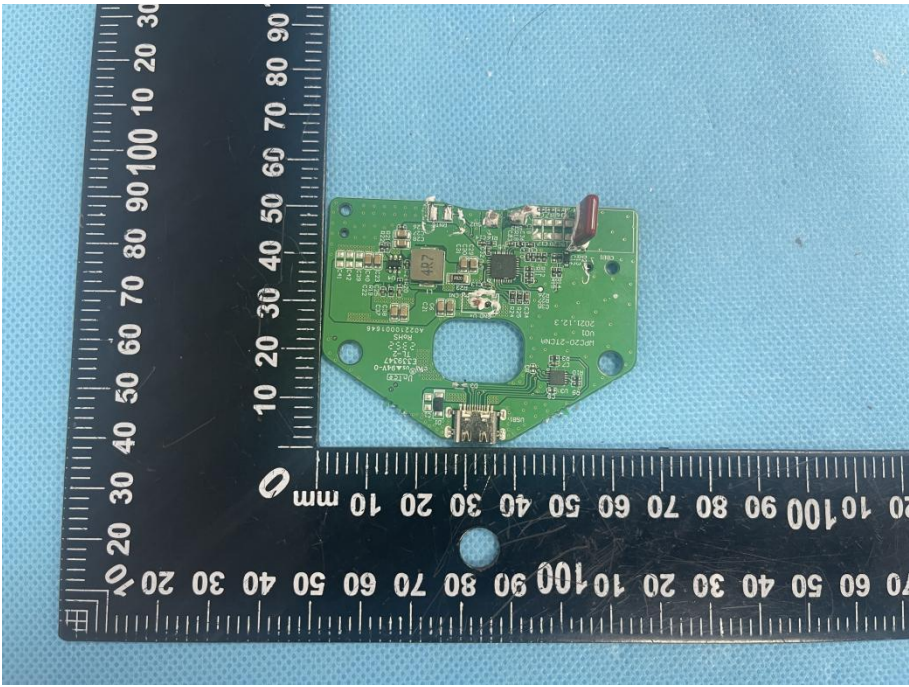

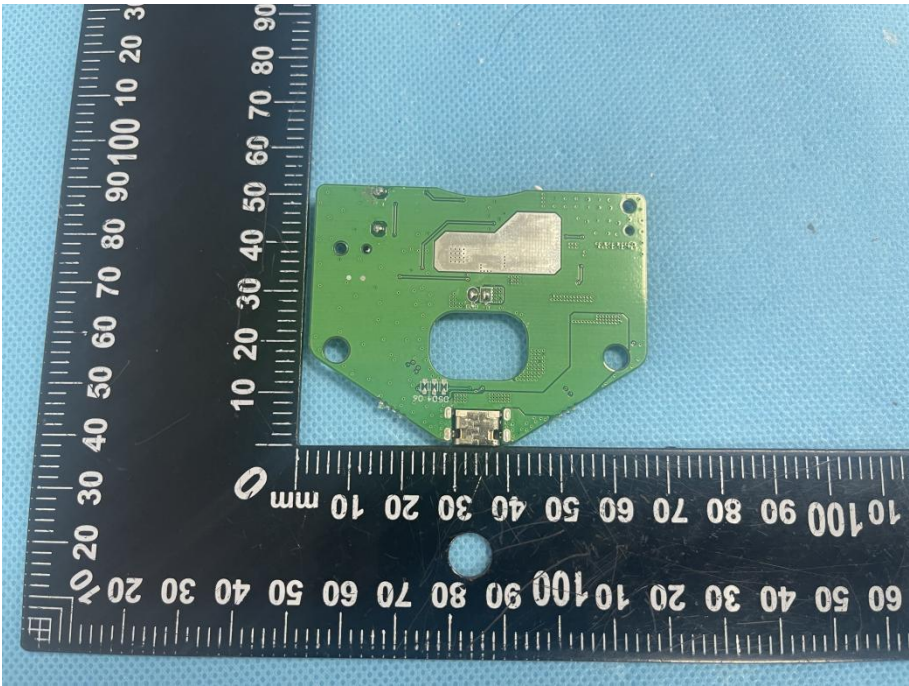

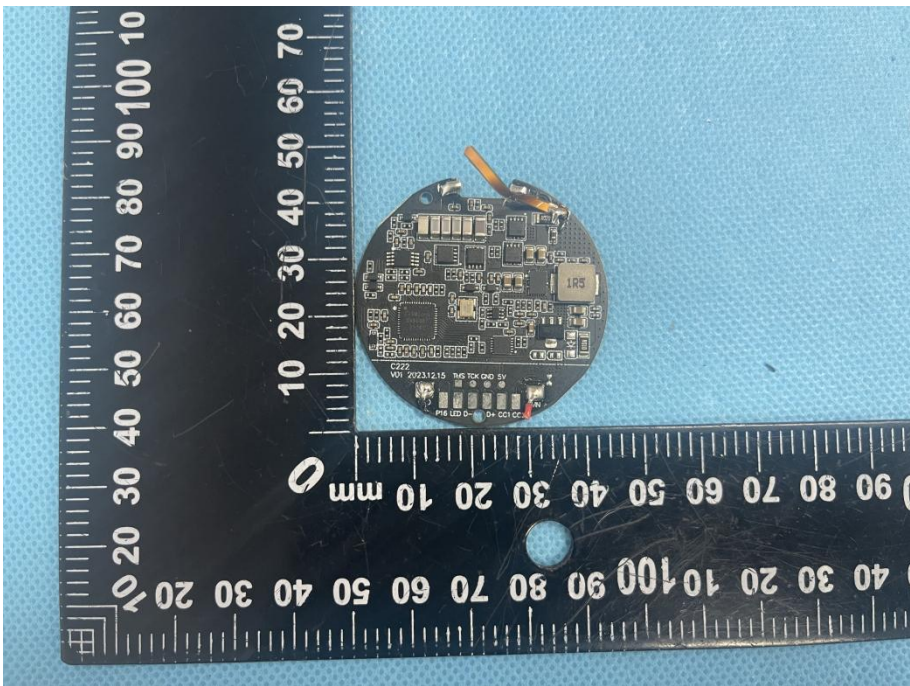

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	 A photograph showing the disassembled components of an Electronic Under Test (EUT). On the left is the white plastic housing with a small red and black wire protruding from its interior. In the center is the white plastic back cover with four screws. To the right is a small, circular, silver-colored component. A black ruler with white markings is placed horizontally below the components for scale.
EUT Housing and Board View 2	 A photograph showing the internal components of the EUT. The white plastic back cover is on the right. On the left, the internal assembly is visible, featuring a green printed circuit board (PCB) with various electronic components, a circular inductor, and a yellow tape. A black ruler with white markings is placed horizontally below the components for scale.

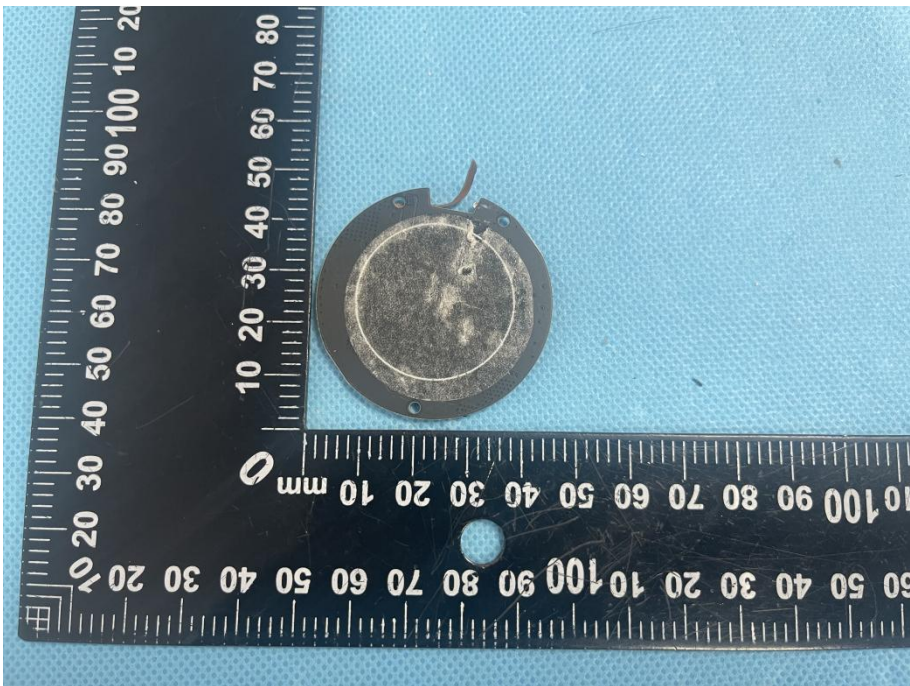

EUT Housing and Board View 3	 A photograph showing the internal components of a circular electronic unit (EUT) housing. The unit is open, revealing a printed circuit board (PCB) with various electronic components, including a microcontroller, capacitors, and resistors. The unit is placed next to a black ruler with white markings for scale. The ruler shows measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm).
EUT Housing and Board View 4	 A photograph showing the internal components of a circular electronic unit (EUT) housing, viewed from a different angle. The unit is open, revealing a printed circuit board (PCB) with various electronic components, including a microcontroller, capacitors, and resistors. The unit is placed next to a black ruler with white markings for scale. The ruler shows measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm).

Solder Board-Component View 1	 A photograph of a green printed circuit board (PCB) component, labeled 'Solder Board-Component View 1'. The component is irregularly shaped with a central circular cutout and several mounting points. It is placed on a blue textured surface next to a black L-shaped ruler for scale. The ruler has white markings in millimeters, with the horizontal scale ranging from 0 to 100 mm and the vertical scale from 0 to 90 mm. The PCB features various electronic components, including a large integrated circuit (IC) in the center, several resistors, and a small red component on the right side. The text 'WALTEK' is visible on the PCB.
Solder Board-Component View 2	 A photograph of the same green PCB component, labeled 'Solder Board-Component View 2'. This view shows the reverse side of the component, which has a large, rectangular silver-colored solder pad in the center. The component is placed on the same blue textured surface next to the same black L-shaped ruler for scale. The ruler's horizontal scale ranges from 0 to 100 mm, and the vertical scale ranges from 0 to 90 mm. The PCB has several mounting points and small electronic components. The text 'WALTEK' is visible on the PCB.
