February 8, 2017

Dear Ladies and or Gentlemen:

We are submitting for **Whirlpool Corporation** the **Amber WiFi Module, Model Number WICHAM01**, with an **FCC ID: A5UWICHAM01** for a Class II Permissive Change Certification to add a flex dipole external antenna option to the existing Single Modular Approval.

The original test report applies to this filing to show the RF Conducted testing compliance of the module, as the same PC Board applies. The Original Block Diagram and Schematics of the RF Circuitry will not change. The PCB Boards pictured in the Original Internal & External Photos are identical. A Filing Photo of the New Antenna is submitted here. The Original Label Exhibit, Modular Certification Request Letter, and Mobile RF Exposure Brief are all applicable to this filing. (The antenna being added has a lesser gain than the external antennas included with the Original Certification Documentation, and thereby will not change the RF Exposure Brief.)

Please see the new Operational Description and Test Report for particulars on the new antenna.

This unit has been tested and complies to:

Part 15, Subpart C.

Enclosed you will find a copy of our test report with the information and results of tests that is required under Part 15, Section 15.247.

If there are any questions in regard to this application, please call D.L.S. Electronic Systems, Inc. at (262) 279-0210.

Thank you for your assistance in this matter.

Sincerely,

A handwritten signature in black ink, appearing to read "William M. Stumpf". The signature is written in a cursive, flowing style.

William M. Stumpf
