FCC
Lab Division
7435 Oakland Mills Rd
Columbia, MD 21046

Pursuant to the provisions of Sections 0.457 and 0.459 of the Commission's rules (47 CFR §§ 0.457, 0.459), Hannaford LLC and its affiliates request that the Commission withhold our application for equipment authorization for FCC ID A8Z-2690 and the exhibits listed below be withheld from public disclosure indefinitely.

Exhibits we request to receive permanent confidential treatment:

- Block Diagrams
- Operational Description
- Schematic
- Tune-up Procedure
- Bill of Materials

Each of these exhibits includes non-public product information used to design and manufacture communications equipment in a very competitive market. Hannaford and its affiliates have spent considerable time and effort to develop this information, and only disclose it to third parties who have signed non-disclosure agreements with us. Disclosure of the exhibits would also give our competitors insight into our skills in product development and manufacturing, giving them an advantage over us since we don't have the same access to their design information. Disclosure of the exhibits could also provide others with information that would allow them to compromise the functionality of our devices. The information in the exhibits should be kept confidential indefinitely, since even when improvements in design are made, disclosure of these designs could give insight into our design and manufacturing techniques that could have a negative competitive impact for years.

With respect,

James Grier
President
